

KONYA PROVINCE AGRICULTURE AND LIVESTOCK SUPPORTS GUIDE 2024

Statement and tables in Konya Province Agriculture and Livestock Guide work have been prepared by Mevlana Development Agency by compiling supports of various institutions and organizations as a guide for our entrepreneurs and farmers from Konya. Updates have been compiled in compliance with the latest available supports. There may be differences or deficiencies in supports, applications, figures and current data and Mevlana Development Agency refuses responsibility for any disputes that may arise because of this reason. In order to get more information about support program you are interested in, please contact relevant institution and follow relevant official platforms.

GRANTS

Supports Given by Ministry of Agriculture and Forestry

Supporting Rural Development Investments

Within the scope of this support, it is planned to support investments made by real and legal persons in economic activities in order to ensure economic and social development in rural areas.

Purpose of the Support

The purpose of this support is; to increase income level in the rural area by considering natural resources and protection of the environment, to support family businesses and small and medium-sized enterprises in order to ensure industrial integration based on agricultural production and agriculture, to develop agricultural marketing infrastructure, to strengthen food safety, to create alternative income sources in rural areas, to strengthen rural economic infrastructure, to make producers use new technologies developed for agricultural activities in a widespread manner, to increase effectiveness of rural development activities that are being carried out, to support new technology investments and individual irrigation systems to contribute to building local development capacity in rural society.

Who can benefit from it?

Real and legal persons (companies, cooperatives for agricultural purposes, associations and their supreme boards) that are already registered in register systems created by the Ministry, can apply for this support. Young entrepreneurs (Ages 18-41) and women are prioritized for investment areas.

Subjects and Rates of Investment

The items listed in the following table are supported at the rate of 50% up to the limit that is indicated:

Agricultural Economic Investment Areas	Upper Limit of Grant Based Project (TL)
Investments for processing, drying, freezing packaging and storing of agricultural products and cold storing&renewable energy modernization investments	If the applicants are real persons, agricultural cooperatives, unions or legal entities, the base project amount for the grant is 14,000,000 TL for new facilities, 12,000,000 TL for completion investments, 10,000,000 TL for capacity increase, technology renewal and/or modernization.
Fixed investments for agricultural production (greenhouses, fungiculture, livestock and slaughterhouse)	
Renewable energy investments (geothermal, biogas, solar and wind) for the consumption of investments in this support program (Greenhouses and only cooperatives and unions for irrigation purposes are eligible)	
Aquaculture (fish breeding)	
Investments for processing, packaging and storage of fertilizers of animal and plant origin	
Economic Infrastructure Investment Areas	Upper Limit of Grant Based Project (TL)
Investments for infrastructure systems for improving family businesses	Applications with a budget up to 3,000,000 TL.
Beekeeping and bee products investments	

IT systems and training	
Handcrafts and value added products	
Silkworm breeding	
Fishbreeding/Aquaculture	
Machinery parks for agricultural cooperatives and unions	
Medicinal and aromatic plant farming	

Detailed investments and individual irrigations systems are supported for such conditions:

- New investments
- Complement of partly completed investments
- Capacity increase, modernization and/or technology renewal investments

Conditions differ according to the type of investment and provinces. For details, notification numbered 2023/51 should be checked.

Supported Costs

- Construction works purchase expenses (covers inevitable costs for enabling the project to be put into practice)
- Machinery, equipment and material purchase expenses (in case of being a part of the whole project)

Costs that are not supported

- Live animal purchase
- Transformer purchases
- Generator purchases outside of the ones for new facilities
- Borrowing expenses and interests
- Rent expenses
- Land, estate, building purchase prices
- Fuel, water, electricity and fee expenses
- Taxes that will be or won't refunded, including VAT
- Second hand good purchase expenses
- Machine repair and parts purchase expenses

Place and Date of Application

Supported items vary depending on the period and province. All or some of the specified investment areas are determined by the Ministry according to the sectoral priorities of the provinces and announced before the application guide to be published every year on November. Applications are done online. The actual registration and provision of information are performed by Provincial Directorates of Ministry of Agriculture and Forestry. For details, notification numbered 2023/51 should be checked. For 2024, latest application date is 19 February 2024.

Other Statements Related to the Support

- Support is given by means of grant for 50% of grant based project amount. Applicants are obliged to provide the remaining 50% of the amount on their own. Payments are made after purchase.

- Project budget is prepared excluding VAT (Value Added Tax).
- The grant based project amount should be minimum 3,000,001 TL. For economic infrastructure investment areas, this amount is 100,000 TL.
- Investments on rental areas are possible. Minimum 7 years of rent term is necessary for land rentals after the last payment.
- Within the scope of processing agricultural products, the investment proposals for secondary processing and packaging of the goods subjected to first processing at another investment facility or products produced in abroad are not considered within the scope of the grant support. (Except for nuts)
- New investment and partly completed facility applications for flour, feed and unseed cotton facilities are not accepted.
- Construction expenses can't be more than 80% for new facility/completion investments, 60% for capacity increase investments and 20% for modernization investments of grant based project amount excluding steel silo, indoor plant production, cold storage and livestock investments.
- For all investments where geothermal, biogas, solar and wind energy will be used as the renewable energy source, the grant support is provided if the facility with renewable energy production or the facility to be established within the scope of this support will supply minimum 51% and maximum 110% of the energy requirement calculated through the installed capacity of the facility. (Off-grid investments are allowed in rural economic infrastructure investments.)
- Except fisheries, the grant based project expenses of new investment applications can't only consist of expenses for purchasing machines and equipment. However, for the project proposals related to completment, capacity increase and/or technology renewal, the grant based project amount can completely consist of expenses for purchasing machines and equipment.
- In investments for storage of agricultural products, only steel silo and cold storage are considered within the scope of the grant.
- Rural economic infrastructure investments can only be applied in villages, towns, rural neighborhoods and settlements with a population of less than 20,000.

Supporting Expert Hands in Rural Development

This support aims to support the entrepreneurship of vocational school, high school and university graduates and to contribute to employment.

Purpose of the Support

The aim of this support program is to contribute to the employment of the young population who graduated from vocational schools, high schools or universities that provide education on agriculture, animal husbandry, forestry, food and fishery products. The program also aims to increase agricultural production, yield and quality by supporting entrepreneurship in the aforementioned sections and encouraging these activities to be carried out by experts.

Who can benefit from it?

Graduates of vocational schools, high schools and universities that provide education on agriculture, animal husbandry, forestry, food and aquaculture can benefit from this support. Applicant must guarantee to live in rural areas/villages with a population of less than 20,000.

Subjects and Rates of Investment

Grants of up to 250,000 TL are paid to the specified project subjects:

- a)** Projects for animal production,
- b)** Projects for herbal, fertilizer and pesticide production,
- c)** Projects for aquaculture production,
- d)** Projects for production of geographically indicated products and traditional products,
- e)** Projects for the processing, storage and packaging of the products specified in subparagraphs a, b, c, d.

Supported Costs

New machinery, equipment, animal, construction and material expenses are supported costs. Applicants who will make bovine and ovine investment projects can only purchase livestock primarily from cooperatives, unions and real and legal entities/institutions that can issue purchasing documents. Matters related to eligible costs are specified in the application guide.

Costs that are not supported

Expenses made before the support agreement are not accepted. Rent, construction, land, building, fuel, water, electricity, transportation, installation, tax, used equipment, consultancy, machine repair and parts expenses are unsupported costs.

Place and Date of Application

Starting and ending dates of applications are determined in the application guide that is published online after the announcement of communiqué in official gazette. Support applications are made online via Ministry's dedicated website.

Other Statements Related to the Support

- The project budget is prepared excluding value added tax (VAT).
- The project must be completed in order for the support payment to be made.
- Newly purchased items cannot be sold, rented, or transferred without the approval of the project management for 3 years after the grant payment.
- This support can only be used once. Persons benefiting from other grants of the Ministry for the same investment project cannot benefit from this support.

- For detailed information, Notification numbered 2023/5 should be checked.

Supporting Individual Irrigation Systems

This support aims to make producers use modern pressurized individual irrigation machines and equipment developed for agricultural activities in a widespread manner.

Purpose of the Support

The purpose of this support is; to ensure production with higher quality and in accordance with market demands and to support individual irrigation systems in order to increase the income level of producers in rural areas by making producers use modern pressurized individual irrigation machines and equipment developed for agricultural activities in a widespread manner.

Who can benefit from it?

Real persons, agricultural companies, irrigation cooperatives and agricultural development cooperatives that are registered Ministry's registration systems, can benefit from this support.

Subjects and Rates of Investment

In this support, 50% of the grant based good purchase amount excluding VAT is supported. Grant based good purchase amount can't exceed 3.000.000 TL. Application budgets are prepared excluding VAT. Supported investments are as follows:

- a) Installation of on-farm drip irrigation system,
- b) Installation of on-farm sprinkler irrigation system,
- c) Installation of on-farm micro sprinkler irrigation system,
- ç) Installation of on-farm underground drip irrigation system,
- d) Installation of Linear or Centre Pivot irrigation system,
- e) Installation of drum irrigation system,
- f) Installation of solar powered irrigation system,
- g) Solar energy systems for agricultural irrigation,
- ğ) Smart irrigation systems.

Supported Costs

- Products such as solar panel, pump, filter, control unit, main pipes and pipes on the sides, connection equipment, valves, dripper and sprinkler equipment
- On-site delivery and installation expenses (in case of issuing purchase invoice including purchase price)

Costs that are not supported

- All taxes refunded or to be refunded including debt payments, interests, VAT and SCT
- Machine and equipment rental values
- Transportation and training expenses
- Banking, education and audit expenses
- Second hand good purchase expenses

Place and Date of Application

Applications are accepted by Provincial Directorates of Agriculture and Forestry. Applications are made within 45 days from the date of publication of the application guide. Applications are accepted until 2025 every year. For detailed information, Notification numbered 2021/7 should be checked.

Other Statements Related to the Support

- Real persons and companies can apply with their own lands or renting lands for at least five years or more in investments specified in the paragraphs (a), (b), (c) and (ç) and for at least ten years or more in investments specified in the paragraphs (d), (e), (f), (g) and (ğ).
- Cooperatives can apply with their own lands or renting public lands for ten years or more.
- Installation of investments in paragraphs (a), (b), (c) and (ç) must be completed within forty five days and installation of investments in paragraphs (d), (e), (f), (g) and (ğ) must be completed within sixty days.
- Cost of transmission line from water source to irrigation area can be maximum 20% of the total cost.
- In solar irrigation systems, cost of solar energy system can be maximum 60% of the total cost.
- The applicant which includes only solar system, is excluded from the grant support.
- Ones who benefited from the irrigation loans of Ziraat Bankası A.Ş. and the Agricultural Credit Cooperatives can't apply for this support for the same area.

Supporting Breeding Heifer Raising

Within the scope of this support, farmers are enabled to benefit from the relevant investment subjects in order to increase animal capacity and productivity.

Purpose of the Support

The purpose of this support is; to establish bovine enterprises raising breeding heifers, to provide breeding heifers needed by our country domestically, to increase productivity and quality in meat and milk production and to support investments that will enable the capital to remain within the country.

Who can benefit from it?

Real and legal persons who are members of Breeding Cattle Breeders Association and active cattle enterprises registered in TÜRKVET system and real and legal persons who want to raise breeding heifers, can apply for the support.

Subjects and Rates of Investment

Items listed in the table are supported at the rate specified. Upper limits of amounts for grant based investment subject are determined by the Ministry and notified to the provincial directorates. An enterprise is enabled to benefit from the support in a way to have a capacity consisting of 50 animals.

Support Item	Rate of Benefiting Supported
New building construction or capacity increase	50%
Purchase of minimum 1, maximum 50 heifers (including buffalo)	30% (50% for those born in Türkiye and obtained from heifer centers and enterprises free from diseases)
Purchase of feed mixer and manure scraper	50%

Supported Costs

- Constructions such as barn, manure pit, feed storage, silage pit are supported.

- Elements affecting appearance of the building such as works that affect carriers of the barn or change the gross construction area related to capacity increase, expanding window areas, converting them into doors, increasing the roof height, changing location or dimensions of elements such as windows and doors are supported.

Costs that are not supported

- Administrative buildings, caretaker houses, security booth, calf shack, roof repair, land grading and environmental structures are not considered within the scope of the support.
- Second hand feed mixer and manure scraper.

Place and Date of Application

Investors who want to benefit from this support apply to the provincial/local directorate in the place where they will make the investment within the period determined and announced on the web page by the Ministry every year.

Other Statements Related to the Support

- Support includes at least one of the following issues; capacity increase/rehabilitation project construction, animal purchase and machine and equipment purchase.
- Payments are made through bank. A service commission at the rate of 0,2% of the support amount is paid to the bank for execution.
- Public institutions and organizations and their partners can't benefit from the grant support within the scope of this support.
- Investors can benefit from credit or tax incentives.
- Grants aren't given to the investors who have benefited from other public institutions' and organizations' supports related to same subject in the form of interest and grant support (those who have benefited from animal purchase, barn construction or repair, feed mixer and manure scraper grant).
- Provinces where the investments determined within the scope of the decision will be supported, are determined by the Ministry every year.
- Heifers/buffalos purchased within the scope of the support can't be sold for 2 years except for force majeure.
- Heifers are obtained from heifer breeding centers, disease-free enterprises, General Directorate of Agricultural Enterprises, Agricultural Credit Cooperatives and their affiliates and breeder/producer organizations.
- For detailed information, Notification numbered 2022/36 should be checked.

Program for Supporting Ovine and Bovine Business Investments

Purpose of the Support

The purpose of this support is to support investments to improve the infrastructure of existing bovine and ovine breeding enterprises, to increase productivity and quality in animal products and to transform them into modern livestock enterprises.

Who can benefit from it?

Real and legal person breeders who have been active for at least 1 year and registered in the registration systems of the Ministry of Agriculture and Forestry can benefit from this support.

Subjects and Rates of Investment

Grant support is given for the construction/capacity increase/modernization of a barn with a capacity of minimum 10 maximum 50 female bovines, minimum 100 and maximum 300 female ovines. Purchase of tents for animal shelter, machinery, tools and equipment are also supported. The upper limit of the investment amount is notified to the provincial directorates by the Ministry.

Subject of Investment	Support Rate
Construction (New barn/capacity increase/modernization)	50%
Tent (for animal shelter)	50%
Purchase of machinery, tools and equipment	50%

Supported Costs

- Construction expenses
- Tent
- Feed preparation machine, manure scraper system, mobile milking machine, milk cooling tank, animal scratching unit, automatic drinker

Costs that are not supported

Administrative buildings, caretaker's house, guard hut, calf hut, simple repair, land leveling, retaining wall and surrounding structures are not supported. All kinds of materials/equipment to be used in construction works, tents for animal shelter, machinery, tools and equipment must be new and second-hand materials/equipment are not allowed.

Place and Date of Application

Applications are received between the dates to be determined by the General Directorate of Livestock. Applications for 2021 are accepted between 1-30 July. Applications are made to the Provincial Directorates of Agriculture and Forestry.

Other Statements Related to the Support

- Real or legal person investors whose applications are approved can benefit from each of the investment subjects once partly or completely.
- Investors who have previously benefited or will benefit from the same support subjects of other public institutions and organizations cannot apply for this support.
- Payments are done through Ziraat Bank.
- If project budget is above the upper limits, exceeding amount of the approved projects are covered by investor.
- During the call periods, the application guide is published on the website of the General Directorate of Livestock (HAYGEM).
- For detailed information, the communiqué numbered 2021/21 should be checked.

Livestock Supports

Different livestock areas are supported within the scope of this program.

Purpose of the Support

The purpose of this support is; to develop livestock farming in our country, to increase healthy production and to ensure sustainability, to protect and improve domestic animal genetic resources in

their place, to keep registration systems up to date, to increase efficiency of livestock policies and to support breeders to fight against animal diseases.

Who can benefit from it?

Each support subject is grouped in a separate tables and eligible beneficiaries are specified under the relevant support subject.

Subjects, Rates of Investment and Relevant Statements

Bee Keeping Supports

Support is given per hive or colony in order to protect and develop bee keeping sector.

Support Subject	Support Amount	Who can benefit from it?	Other Statements
Hive with bees*	60 TL/hive	Producers who buy breeder queen bees or queen bees from queen bee producers who have received permission from the Ministry in the amount determined by the Ministry and use them. Maximum 1000 hive owners can apply to hive with bees program.	Enterprise of the beekeeper who will benefit from the support must be registered to the Beekeeping Registration System(AKS). Beekeepers who want to apply to the support can submit their applications in one month after the Notification to the breeder organizations or local directorates of agriculture and forestry. Maximum 5% of the active hives is benefited from the breeding queen support. This number cannot exceed twenty in total.
Breeder queen bee	200 TL/pcs		
Bumblebee	100 TL/Colony	Beekeepers who use bumblebees in greenhouses registered in the Ministry's Greenhouse Registration System to ensure natural pollination. For detailed information, Notification No. 2022/37 should be checked.	
Bee Gene Protection	80 TL/Hive	Beekeepers within the scope of the project carried out by the Ministry in order to protect and improve animal genetic resources in their place.	For detailed information, Notification numbered 2022/36 (excluding machinery support) should be checked.
Machinery, Tool, Equipment and Beekeeper Shed	%50 of the Costs	Beekeepers who has more than 50 hives with bees. Maximum support limit is decided by the Ministry. For detailed information, Notification numbered 2020/36 should be checked.	

*For organic beekeeping, this amount is stated as 30 TL/hive. For detailed information, Notification numbered 2022/38 should be checked.

Payments are made per queen bee. They are enabled to benefit from breeder queen bee support up to 5% of the number of active hives in the enterprise. This number can't exceed twenty in total.

Calf/Buffer Calf/Buffer Support

Farmers registered in Farmers Register System are enabled to benefit from the animal supports listed in the table in the amounts specified provided their programmed vaccines are completed.

Support Subject	Support Amount (TL/head)	Other Statements
Calf at the age of 4 months and older	750	<p>Breeders who want to apply through an organization can apply through whichever organization they want to get the support, those who want to get support through cooperatives can apply through region or higher provincial associations, those who will get support being registered in pedigree can apply through provincial associations of breeders, those who are not members can apply directly to provincial/district directorates.</p> <p>Calf owners who are eligible with 1-20 animals are supported for 100%, 21-100 for 75% and 101-500 for 50%.</p> <p>Additional supports can't be given alone. For detailed information, Notification numbered 2022/36 should be checked. Applications are made until 2/1/2023 for the first term and between 3/4/2023-15/6/2023 for the second term. Applications for buffalo calf support are made until the end of 2022 and between 1/7/2023-1/8/2023. Buffalo cow support applications are made until 30/12/2022.</p>
Complying reproduction parameters (calves)	Additional 300	
Artificial insemination calves	Additional 450	
Calves registered in pedigree	Determined by the Ministry	
Progeny controlled insemination calves	Additional 200	
Buffalo cow	1000	
Buffalo cow registered in pedigree	Additional 600	
Buffalo calf at the age of 4 months, whose vaccinations are completed	1000	
Buffalo calf registered in pedigree	Additional 600	
Artificial insemination buffalo	Additional 1000	

Slaughter Support

This program supports breeders who slaughter male cattle (including buffalo) that are registered in the Ministry's registration systems, were born in the country and completed fattening period in slaughterhouses in accordance with the legislation.

Support Subject	Support Amount	Other Statements
Slaughter of male cattle - buffalos in slaughterhouses (for 1-200 heads)	500 TL/Head	<p>Male cattle (including buffalo) that are registered in TÜRKVET, were born in the country and completed at least 12 months of age, are supported. Minimum carcass weight varies according to species.</p> <p>A breeder is enabled to benefits from the support for maximum 200 (including 200th) cattle.</p>

		<p>Support is not paid for male cattle that are sent to obligatory slaughter and for male cattle whose carcass was decided to be disposed in the examination after slaughter.</p> <p>Applications are made to associations of meat producers or provincial/district directorates.</p> <p>For detailed information and specie chart, Notification numbered 2022/36 should be checked.</p>
--	--	--

Mother Sheep, Mother Goat and Ram/Male Goat Support

Breeders who breed breeding sheep-goats, who are members of breeding sheep-goat breeders associations and whose animals are registered in the Ministry's registration systems, can benefit from this support.

Support Subject	Support Amount
Mother sheep	100 TL/head
Mother goat	100 TL/head
Angora goat	40 TL/head
Mother sheep/goat of nomad people	Additional 4 TL/head
Ram-Male goat	2,000 TL/head

- Age of animals that will benefit from the support must be at least 15 months old.
- For enterprises that received mother animal support in the previous year and increased the number of mother animals in support year, additional 200 TL herd growing and renewing support payment is made per animal in addition to previous support year's lambs and kids that reached mother animal qualification in the support year.
- Applications are made to the breeder associations until 2/12/2022. For detailed information, Notification numbered 2022/36 should be checked.
- Ram- male goat support is valid for animals purchased from the Ministry's breeding programs or from breeding programs at ram-goat centers established by the Ministry.

Supporting Angora Goat Breeding and Mohair Wool Production

Support is paid per kilogram to the producers who sell the mohair wool they produce to Tiftikbirlik, cooperatives of Tiftikbirlik, associations of breeding sheep and goat breeders or approved businesses and who register them in the Mohair Wool Registration System database. For detailed information, Notification numbered 2022/36 should be checked.

Support Subject	Support Amount
Kid Mohair	140 TL/kg
Principal Mohair	120 TL/kg
Secondary Mohair	50 TL/kg
Contracted Production	Additional 20 TL/kg

Forage Crops Production Support

For forage crops support in accordance with Turkish Agricultural Basins Production and Support Model, the amount specified in the table is paid per decare to producers who cultivate perennial and annual

forage crops in order to produce roughage on their lands registered in Farmers Register System and in the appropriate basins only if they harvest the product. For crop details, Notification 2022/37 should be checked.

Forage Crops Support	Production TL/da/Year	Other Statements
Perennial Forage Crops	90	50% support is paid in addition to forage crop support for forage pea, vetch, Hungarian vetch, tare and grasspea sown in 2023 in the basins where groundwater is insufficient and water is limited according to determination of the Ministry. Total cultivation area to be utilized is at minimum 10 decares. If annual forage crop is cultivated in the same parcel in the same year and if perennial forage crop is cultivated after the harvest and it is harvested, support payment is given to both cultivations.
Annual Forage Crops and Dry Crops	60	
Silage Crops	100	
Artificial Meadow	150	

Animal Disease Compensation Supports

Amounts of animals slaughtered compulsorily or killed under the supervision of an official veterinarian or veterinarian authorized by the Ministry as a result of determination of compensated diseases specified in the Compensation Regulation for Animal Diseases, amounts of animals killed due to compensated disease detected in slaughterhouses and animals that are determined by Official Veterinarian report that they died due to vaccination and serum administration performed by the official veterinarian or assistant health personnel under his supervision and veterinarian authorized by the Ministry with the aim of enabling protection against a disease that must be reported, are given to owners of the animals as animal disease compensation support. If a disease is detected, the removal of animal products, feed, substances and tools are handled in accordance with regulations and costs are paid as compensation.

As a result of glanders, bovine tuberculosis, bovine brucellosis, sheep and goat brucellosis, bird flu, African horse plague, bird flu diseases, values of animals are assessed within the scope of principles determined by the Ministry and they are slaughtered or killed conditionally. Decision of Value Assessment Commission is issued within the scope of the principles determined by the Ministry with the Compensation Regulation for Animal Diseases and kept in provincial/district directorate.

Within the scope of Compensation Regulation for Animal Diseases, prices of animal products, feed, substances and materials and all of their disposal, transportation and disinfection costs are given to owners of the animals as animal disease compensation support on the basis of amounts determined by the local value assessment commission.

Note: Compensation is not paid for animals belonging to official institutions and municipalities, for animals that referred by their owners as sick without documents specified by the Ministry or that die without having been examined by the official veterinarian (excluding anthrax), for productivity losses due to vaccine, serum and drug applications against diseases that must be reported and to animal owners who don't have these done to their animals although it has been decided by the Ministry that disease must be reported and vaccination, medication administrations or tests must be done. In the

cases listed above, prices of meat, skin and other parts of animals that are possible to be used and consumed are deducted from the compensation that they are eligible to get.

Vaccination and Ear Tag Supports

Unit prices specified in the table are paid to people carrying out the works (provided that contact with the business manager is ensured) for scheduled vaccinations and ear tag applications determined by the Ministry within the framework of fighting against animal diseases. For detailed information, Notification numbered 2022/36 should be checked.

Support Subject	Support Amount	Other Statements
Bovine Vaccination	4 TL/Head	Vaccinations are performed by an official veterinarian and veterinary health technician. People carrying out the work make the application. Freelance veterinarians can benefit from ear tag support. Public officials and contracted employees in the enterprises can't benefit from the supports.
Ovine Vaccination	TL/Head	
Bovine Ear Tag Application	4 TL/Head	
Ovine Ear Tag Application	3 TL/Head	

Waste Support

Waste support payments are made in the amounts specified in the table to the owners of the animals for waste generated after vaccinations programmed by the Ministry. For detailed information, Notification numbered 2022/36 should be checked.

Support Subject	Support Amount	Other Statements
Bovine waste (after vaccination)	3000 TL/Head	It is made for the waste generated after vaccination determined by the Ministry and performed by the official veterinarian or assistant health personnel under his supervision and veterinarian authorized by the Ministry. Animals generating the waste must be identified and recorded and they must be registered in the enterprise where vaccination is administered, there mustn't be more than 72 hours after vaccination and waste must be seen by an official veterinarian.
Ovine waste (after vaccination)	500 TL/Head	

Support for Enterprise Free from Disease

Payment is made at the amounts specified in the table to the owners of the animals for all cattle except for male animals older than six months outside of breeding bulls in farms that have a health certificate. Support payment is made to each animal once a year. For detailed information, Notification numbered 2022/36 should be checked.

Support Subject	Support Amount	Other Statements
-----------------	----------------	------------------

Enterprise Free from Disease	1200 TL/Head	<p>Payment per cattle free from disease is full payment up to 500 animals and it is the amount corresponding to 50% for 501 animals and more.</p> <p>Breeders who apply for a health certificate for disease-free businesses are deemed to have applied for this support.</p> <p>Payment is made per animal at the amount specified on the left side additionally for all cattle that receive support for enterprise free from disease in the enterprises holding an Approved Dairy Farm Certificate.</p>
Approved dairy farm	200 TL/Head (additional)	

Animal Gene Resources Support

Payment is made per animal to breeders who are within the scope of the project carried out by the Ministry in order to protect and improve animal genetic resources in their place and registered in farmers register system for protection and improvement of herds different from bovine and ovine.

Breeders who will benefit from support for protection in their place, reside at protection area and can't raise different breeds of the species for which they receive support. Among the breeders, those who have at least one of their children with them, don't engage in anything other than breeding, have received agricultural training, and don't carry out bovine breeding and ovine breeding together are preferred.

Those who want to apply and get detailed information, notification numbered 2022/36 should be examined.

Support Subject	Support Amount		Other Statements
Bovine protection	1,600 TL/Head		Payments of calf/buffalo calf at the age of 4 months and older, pedigree and progeny testing under the title of "Animal Supports" are not made for cattle (including buffalo) that are enabled to benefit from this support.
Ovine protection	240 TL/Head		
Bovine precision protection	3,000 TL/Head		
Ovine precision protection	1,500 TL/Head		
Bee protection	200 TL/Hive		
Improvement support in the hands of public for sheep/goats and their offspring that are in improvement program	In elite herd	300 TL/Animal	Breeding mother sheep-goat support per animal is not given for sheep-goats that are enabled to benefit from this support.
	Base herd	160 TL/Animal	
Buffalo improvement in the hands of public (mother buffalo)	Bull and mother buffalo which gives birth within year	4,000 TL/Animal	
	Mother buffalo that doesn't give birth within year	2,500 TL/Animal	
Cattle improvement in the hands of public (mother native cattle and bull)	4,000 TL/Animal		

Cattle separated for breeding (heifer and bullock)	3,250 TL/Animal		
Buffalo separated for breeding (heifer and bullock)	3,250 TL/Animal		
Breeding male material (ram and goat)	Elite herd	700 TL/Animal	
	Base herd	400 TL/Animal	

Note: Bee protection support within the scope of this support is also specified under the title of “Bee Keeping Supports”.

Breeds and number of animals to be supported in Konya during the period are specified in the table.

Breed	Total Number of Animals to Be Supported (Head)
Domestic Black Cattle	3.000
Domestic Black Cattle (Pedigree Protection Support)	500
Dağlıç Sheep	1.500
Akkaraman Sheep	30,000 heads of mother, 1,500 heads of male
Central Anatolian Merino Sheep	6,000 heads of mother, 300 heads of male

Shepherd (Herdsman) Employment Support

Shepherd employment support is paid to enterprises or shepherds that have 100 or more mother ovine (sheep-goats).

Support Subject	Support Amount	Other Statements
Herdsman Employment Support	30.000 TL/Enterprises	<p>Shepherd must work in the enterprise. Shepherds who graze the neighborhood herds can also benefit from it. These herds must consist at least two enterprises and each enterprise must have maximum 99 animals. In total, there must be at least 100 animals.</p> <p>Social security premiums of the shepherd must be deposited for at least 5 months without interruption.</p> <p>Those who don't deposit social security premiums fully on the basis of 30 days, those who are employed in the enterprise but do not actually work as shepherds, those who have social security premium debt, muhtars, civil servants, retirees and those under the age of 18 are not considered as a shepherd within the scope of the support.</p> <p>For detailed information, Notification numbered 2022/36 should be checked. Applications are made by shepherds or owners to provincial/district directorates until 13/1/2023.</p>

Raw Milk Support

Payment is made on the basis of unit prices to the producers who are members of one of the livestock organizations, who sell raw milk they produce to milk processing plants within the scope of the Regulation on Registration and Approval Procedures of Food Enterprises. Raw milk support work schedule is determined by HAYGEM (General Directorate of Livestock).

Support Subject	Support Amount	Other Statements
Raw Milk Support	It is determined by the Ministry depending on the periods	<p>It is paid on the basis of periods and unit prices to be determined by the Ministry differently for cow's milk that is cooled or marketed in accordance with food legislation, for cooled cow's milk marketed through producers' organizations and for buffalo, sheep and goat's milk. Support is paid to the accounts of the breeders.</p> <p>Product that is turned into milk product is also supported within the framework of the contract with the Meat and Milk Institution. In the support, the amount of milk equivalent to 1 kg of milk product is taken as basis.</p> <p>Enterprises producing milk with certificate showing that they are enterprise free from disease benefit from the support provided that they sell raw milk they produce to local retailers registered in the Ministry's Milk Registration System (BSKS) or to milk filling facilities registered in the same system in return for invoices.</p> <p>Producers who want to benefit from the support apply to that breeder/producer organization if they are members of a breeder/producer organization authorized for data entry to BSKS or they apply to provincial/district directorates through the organization if they are members of a breeder/producer organization that is not authorized for data entry to BSKS.</p> <p>Enterprise of those who will benefit from raw milk support and the animals from which milk will be obtained must be registered in TÜRKVET.</p> <p>The implementation rules are determined by the General Directorate of Livestock (HAYGEM). For detailed information, the communiqué numbered 2023/8 can be checked.</p>
Milk Content Analysis for Improvement	Up to 100 TL/head	The holding must have at least ten pure dairy cows and/or combined breed cows born as a result of

		<p>artificial insemination, whose milk analysis has been done.</p> <p>Those who apply for calf support through breeding cattle breeder associations are also considered to have applied for this support.</p> <p>Applications are made to the provincial/district directorates after Summary-1 list is published on February 2023 by HAYGEM. For detailed information, Notification numbered 2022/36 should be checked.</p>
--	--	---

Forage Support for Low Capacity Ovine and Bovine Farms

Purpose of the Support

This support is given for low capacity ovine and bovine farms that have difficulty in forage supply. The main purpose is to maintain the productivity and protect farmers from forage cost increases. This is a one-time only support for farmers during Covid-19 pandemic.

Who can benefit from it?

Registered farmers that have less than 21 bovines or less than 51 ovines can benefit from this support.

Support Rates

Each bovine is paid 65 TL, and each ovine is paid 6.5 TL within the support program. Payments are made to farmers through Ziraat Bank.

Place and Date of Application

This support program is run by the Ministry of Agriculture and Forestry. Applications are accepted after 11/07/2020.

Contracted Breeding Support

Purpose of the Support

The aim of this support is to decrease the idle capacities of existing breeding businesses, maintain red meat production, plan the supply of producers properly and set a model for the sector.

Who can benefit from it?

Breeders who sign a breeding contract with the Meat and Dairy Institution (ESK) can benefit from this support.

Support Rates

Payments are made for carcasses by Meat and Dairy Institution according to weight detailed below;

- 201-250 kg, 2.5 TL/kg
- 251-300 kg, 3,5 TL/kg
- Over 301 kg, 5.5 TL/kg

Place and Date of Application

This support is designed to be implemented for 5 years starting from September 2022. The implementing institution is the Meat and Dairy Institution (ESK).

Other Statements Related to the Support

- Contract conditions, determination of breeders, criteria and implementation of this support are made by Meat and Dairy Institution (ESK).
- Maximum of 200 cattles can benefit from this support.
- Payments are made through T.C. Ziraat Bank.
- For detailed information, Presidential Decree No. 6004 should be examined.

Fuel, Fertilizer and Soil Analysis Support

Diesel, fertilizer and soil analysis support payment is given to farmers by considering size of the agricultural land registered in farmers register system where they are engaged in agricultural activities. For detailed information, Notification numbered 2022/37 should be checked. For grains in 2023, support is provided only for fuel and fertilizer purchases via Ziraat Bank accounts as loans and direct payment is unavailable.

Supported Products	Diesel (TL/da)	Fertilizer (TL/da)	Total Support (TL/da)
Barley, Wheat Rye, Oat, Triticale	103	46	149
Paddy	250	21	271
Hazelnut, Onion, Olive, Sugar Beet	86	21	107
White Beans, Chickpeas, Safflower	103	21	124
Cotton Unseed	345	21	366
Potato, Soy	172	21	193
Sunflower for Oil, Canola	121	21	142
Forage Crops	94	21	115
Other Products	86	21	107
Fallow	40	-	40

- Diesel and fertilizer support payments are not made to products outside the basins determined for products within the scope of Turkish Agricultural Basins Production and Support Model.
- If other products that are not listed in the table are products supported within the scope of Turkish Agricultural Basins Production and Support Model, they are supported at the amount specified in "Other Products" section.
- If agricultural land is used by more than one farmer in the same production year, support is paid to the first farmer.
- If more than one production is made on the same land in one production year, payment is made for only one production. The production with more total support amount is taken into account.
- Soil analysis support is paid as 50 TL per 50 decares on minimum 50 decares of land. Soil analysis support is paid once for the same parcel in one production season.

- Soil analysis is obligatory to benefit from fertilizer support.
- Farmers who are registered in ÇKS (Farmers Register System) in 2023 production year are considered to have applied for diesel and fertilizer support without any application.
- 30 TL support is paid per decare within the scope of Solid Organic-Organomineral Fertilizer Support.

Rent Support for Product Storage in Licensed Warehouses

Purpose of the Support

This support aims to enable producers to access a healthy and insured warehouse opportunity, to ensure that they don't have to sell off their products during harvest periods when prices are low and to enable enterprises in commerce and industry sectors based on agriculture to access requested amount, type and quality of products at any time desired easily and reliably without building a warehouse for the products they need.

Who can benefit from it?

Producers and producer organizations who are registered to Agricultural Production Registration System (TÜKAS) and Farmer Registration System (ÇKS) can benefit from this support.

Supported Products and Rates

Products in the relevant tables are supported in the specified amounts. Supports are paid to producers and producer organizations who are registered to Agricultural Production Registration System (TÜKAS) and Farmer Registration System (ÇKS)

Product	Rental Support (TL/Ton/Month)	Transport Support (TL/Ton)	Upper Limit in Transport (Tons)	Analysis Support (TL/Lot)
Wheat, Barley, Oat, Rye, Corn, Paddy, Rice	6	25	30	25
Lentil, Chickpea, Bean, Soybean	8	25	30	25
Sunflower	10	25	30	25
Cotton	25	25	30	12
Hazelnut	15	100	7,5	6
Pistachio	30	100	7,5	25
Dried Apricot, Dried Grape	30	100	7,5	50
Olive, Olive Oil	15	25	30	15

Place and Date of Application

Applications are made to the provincial/district directorates until 30/6/2024.

Other Statements Related to the Support

- If they are the first to deliver, registered producers and producer organizations are given rental support for each product in the amounts specified in the table for a maximum of six months.
- Producers and producer organizations benefiting from rental support are paid an analysis fee in the amounts specified in the table for each product type delivered to the licensed warehouse, provided that the limits specified in the table are not exceeded. Analyzes are to be made by authorized classifiers before delivery to the warehouse.

- Payments are made through Ziraat Bank at least two times a year.
- For detailed information, the communiqué numbered 2023/49 should be examined.

Difference Payment Supports for Turkish Agricultural Basins Production and Support

Purpose of the Support

It is aimed to pay support for some products that are produced and sold in Türkiye's agricultural basin determined within the scope of the Decision on Determination of the Agricultural Basins.

Who can benefit from it?

Real and legal persons except for public institutions and organizations can benefit from the supports if their personnel, product and land information are registered in Farmers Register System, if they are located in the determined basins, if it is determined by the provincial and district directorates of the Ministry that they produce products to be supported and if make application for the support within the legal period to be determined. For detailed information, Notification numbered 2022/37 should be checked.

Supported Items and Rates

Difference payment support is made to produced and sold products specified below.

Supported Products	(Kırş./Kg)
Wheat	100
Barley, Oat, Rye, Triticale	50
Safflower	55
Paddy	10
Corn Kernel	3
Olive	15
Canola	100
White Beans, Chickpeas, Lentils	50
Unseed Cotton*	160
Soy	60
Sunflower for Oil	100
Tea	30
Olive Oil	80

*Those who use certified seeds produced domestically can benefit from it. Maximum 500 kg for each decare is paid as support.

Districts that can benefit from the supported products in the table are listed in the following table.

Name of Basin	Products Supported in Konya Province
Ahırlı	Barley, Wheat, Sunflower (For Oil), Chickpeas, Triticale, Forage Crops, White Beans

Akören*	Barley, Wheat, White Beans, Lentils, Chickpeas, Sunflower (For Oil), Forage Crops, Corn (Kernel), Potato
Akşehir*	Barley, Safflower, Wheat, Sunflower (For Oil), Corn (Kernel), White Beans, Chickpeas, Triticale, Forage Crops, Oat, Potato
Altınekin*	Barley, Safflower, Wheat, Corn (Kernel), White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato, Canola
Beyşehir	Barley, Safflower, Wheat, Sunflower (For Oil), Corn (Kernel), White Beans, Lentils, Chickpeas, Triticale, Forage Crops, Potato
Bozkır	Barley, Wheat, Lentils, Chickpeas, Forage Crops, Potato
Cihanbeyli*	Barley, Safflower, Wheat, Corn (Kernel), Canola, White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Çeltik	Barley, Safflower, Wheat, Corn (Kernel), Canola, White Beans, Sunflower (For Oil), Forage Crops, Oat, Potato, Onion
Çumra*	Barley, Wheat, Corn (Kernel), Canola (Colza), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Derbent*	Barley, Wheat, Sunflower (For Oil), White Beans, Chickpeas, Triticale, Forage Crops, Oat, Potato
Derebucak	Barley, Safflower, Wheat, White Beans, Chickpeas, Sunflower (For Oil), Forage Crops
Doğanhisar*	Barley, Safflower, Wheat, White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Emirgazi*	Barley, Wheat, Sunflower (For Oil), Rye, Corn (Kernel), Chickpeas, Triticale, Forage Crops
Ereğli*	Barley, Wheat, Rye, Corn (Kernel), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato, Onion
Güneysınır*	Barley, Wheat, Corn (Kernel), White Beans, Lentils, Chickpeas, Sunflower (For Oil), Forage Crops, Oat
Hadim	Barley, Wheat, White Beans, Chickpeas, Forage Crops
Halkapınar*	Barley, Wheat, Rye, White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat
Hüyük	Barley, Safflower, Wheat, White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
İlgin	Barley, Safflower, Wheat, Rye, Corn (Kernel), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato
Kadınhanı*	Barley, Safflower, Wheat, Corn (Kernel), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato
Karapınar*	Barley, Wheat, Rye, Corn (Kernel), Canola (Colza), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Karatay*	Barley, Safflower, Wheat, Rye, Corn (Kernel), Canola (Colza), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Kulu*	Barley, Safflower, Wheat, Rye, Canola, White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat
Meram*	Barley, Safflower, Wheat, Corn (Kernel), White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato
Sarayönü*	Barley, Safflower, Wheat, Corn (Kernel), White Beans, Lentils, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato

Selçuklu*	Barley, Wheat, Corn (Kernel), Canola (Colza), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato
Seydişehir	Barley, Wheat, Corn (Kernel), White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Potato
Taşkent	Barley, Wheat, Rye, Chickpeas, Triticale, Forage Crops
Tuzlukçu*	Barley, Safflower, Wheat, Rye, Corn (Kernel), Soy, White Beans, Chickpeas, Triticale, Sunflower (For Oil), Forage Crops, Oat, Potato
Yalıhüyük	Barley, Wheat, Canola (Colza), White Beans, Chickpeas, Triticale, Forage Crops
Yunak	Barley, Safflower, Wheat, Corn (Kernel), Canola (Colza), White Beans, Chickpeas, Lentils, Sunflower (For Oil), Triricale, Forage Crops, Oat, Potato

* In districts determined within the scope of limited water, drip irrigation is stipulated in corn (kernel) production.

Other Statements Related to the Support

- Support payments made are limited to the products determined for each basin.
- In the basins determined by the Ministry that groundwater is insufficient and water is limited; additional 50% support is paid to chickpea and lentil products cultivated in 2023; support is not paid to corn kernel except for areas irrigated with drip irrigation.
- Purchase and sale certificate is asked for payments.

Supports for the Use and Production of Certified Seed and Sapling

Support for the Use of Domestic Certified Seed

Purpose of the Support

It is aimed to support farmers in our country in order to increase plant production, to increase yield and quality, to ensure sustainability and to develop alternative environment friendly agricultural techniques.

Who can benefit from it?

Farmers carrying out sowing/planting activities in the basins listed in the annex of the Decision on Agricultural Supports to be given in 2023 by using certified seeds can benefit from the support for the use of domestic certified seed.

Farmers must buy the seeds that they use from seed producers or seed dealers in accordance with provisions of Authorization and Inspection Regulation in the Seed Sector.

Supported Items and Rates

According to the figures determined in 2023, amounts in the table are paid for the products specified for each basin accordance with Turkish Agricultural Basins Production and Support Model (Sesame seed and peanut are supported in every basin). Notification number 2022/37 should be checked for table of minimum planting norm and other information.

Support Subject	Support Amount (TL/da)
Barley, Wheat, Rye, Triticale, Oat, Paddy	65
Safflower	15

Soybean, Vetch, Sainfoin, Feed Pea	58
Canola	40
White Beans, Lentils	78
Chickpeas	65
Potato	260
Sesame Seeds	10
Peanut	45
Alfalfa	78
Sunflower for Oil	135

In the basins determined by the Ministry that groundwater is insufficient and water is limited; 135 TL per decare support is paid to the farmers who use certified sunflower seeds for oil on their registered lands in 2023.

Support for the Use of Domestic Certified Sapling/Seedling, Strawberry Seedling and Standard Sapling Purpose of the Support

It is aimed to support farmers in our country in order to increase plant production, to increase yield and quality, to ensure sustainability and to develop alternative environment friendly agricultural techniques.

Who can benefit from it?

Farmers who planted in fall 2023 and 2024 and who were registered in Farmers Register System in 2023 can benefit from the supports.

Seedlings and saplings must be obtained from authorized producer or seed dealer or they must be certified.

Supported Items and Rates

Saplings and seedlings specified below are supported in the amounts on a decare basis. For detailed information, Notification numbered 2022/37 should be checked.

Support Item	Support Amount (TL/da)	
	Standard	Certified
Pistachio, Walnut, Almond, Blueberry and Aronia	250	800
Pear, Quince, Apple, Cherry, Nectarine, Peach, Plum, Lemon, Tangerine, Orange, Apricot, Sour Cherry, Olive, Other Fruit Species and Grape (except Pomegranate and Banana)	250	600
Certified Strawberry Seedling and Garden Facility	-	800

Support for the Production of Domestic Certified Seed

Purpose of the Support

With this support, it is aimed to support farmers in our country in order to increase plant production, to increase yield and quality, to ensure sustainability and to develop alternative environment friendly agricultural techniques.

Who can benefit from it?

Real and legal persons that produce seeds/have them produced in the country and obtain their certificate, that are regarded as a seed enterprise authorized by the Ministry, can benefit from the relevant support for the seeds they produce in 2023. Applications are made through certified entry from e-government gateway.

Notification numbered 2022/37 should be checked.

Supported Items and Rates

Support Item	Certified Grade (TL/kg)	Original/Basic and Above Grade (TL/kg)
Barley	0.10	0.08
Safflower	0.80	0.50
Wheat	0.12	0.10
Rye	0.16	0.08
Paddy	0.35	0.25
Vetch	1.60	1.50
White Beans	0.60	0.50
Canola (Colza)	1.80	1.20
Sainfoin	1.60	1.50
Lentils	0.60	0.50
Chickpeas	0.60	0.50
Potato	0.20	0.10
Soybean	0.70	0.35
Sesame Seed	1.80	0.60
Triticale	0.10	0.08

Feed Pea	1.60	1.50
Peanut	1.00	0.80
Alfalfa	5.00	4.00
Oat	0.16	0.08

Support for the Production of Domestic Certified Sapling

Purpose of the Support

The purpose of the support is to make domestic certified sapling production support per piece for grafted and ungrafted saplings in the certified class that are produced, certified and sold domestically in the lands registered in ÇKS.

Who can benefit from it?

Real and legal persons who have sapling producer certificate can apply for certified sapling production support. It is entered to domestic certified sapling production support through e-government gateway.

Sapling certification period is between 1.3.2022-30.04.2023 and deadline to complete the sale is 31.10.2023. For detailed information, Notification numbered 2022/37 should be checked.

Supported Items and Rates

Certified Sapling Production (All Varieties in Certified Class)	Support Amount TL/pcs
Grafted Sapling	0.5
Ungrafted Sapling	0.25

Organic Farming Support, Good Agriculture Support, Biological and Biotechnical Fight Support

Organic Farming Support

Purpose of the Support

It is aimed to improve organic farming practices in production of certain products all around the country and within this context, various products are supported on a decare basis.

Who can benefit from it?

Farmers who are registered in Farmers Register System and Organic Farming Information System in 2023 production year, who have been engaged in organic farming and have a "product certificate" for the product they produce in the agricultural lands in transition process-2, transition process-3 and organic status, can benefit from it. For Category Product List and detailed information, Notification No. 2022/37 should be checked.

Supported Items and Rates

Organic Farming Support	Certificate Type	(TL/da)
1 st Category Products	Product Certificate (Individual)	180
	Product Certificate (Producer Group)	90
2 nd Category Products	Product Certificate (Individual)	72
	Product Certificate (Producer Group)	36
3 rd Category Products	Product Certificate (Individual/ Producer Group)	30

Good Agricultural Practices Support

Purpose of the Support

With this support, it is aimed to develop good agricultural practices in certain categories all over the country.

Who can benefit from it?

Farmers who carry out good agricultural practices and have certificate of good agricultural practices issued by the authorized organizations in 2023 production year and those who are registered in Greenhouse Registration System (ÖKS) among the farmers who carry out good agricultural practices in greenhouses can benefit from this support. Areas that are not registered in ÖKS benefit from support for production in open area. For Category Product List and detailed information, Notification No. 2022/37 should be checked.

Supported Items and Rates

Good Agricultural Practices Support		Certificate Type	(TL/da)
1 st Category Products	Greenhouse Production	Individual Certification	270
		Group Certification	135
	Production in Open Area	Individual Certification	90
		Group Certification	45
2 nd Category Products		Individual Certification	40
		Group Certification	20
3 rd Category Products		Individual and Group Certification	10

Place and Date of Application

Applications should be made to Provincial/District Directorates of Agriculture and Forestry. Application deadline is 08.05.2023.

Biological and Biotechnical Fight Support

Purpose of the Support

The purpose of this support is to support producers who are engaged in biological and/or biotechnical fight in order to reduce the use of chemical pesticides by implementing alternative fighting techniques instead of chemical fight in plant production and to protect human health and natural balance.

Who can benefit from it?

Producers whose greenhouse production area is registered in ÖKS and open production area is registered in ÇKS can benefit from the supports if they carry out this practice.

Supported Items and Rates

Investment Type	Support Type	Support Amount (TL/da)
Greenhouse	Greenhouse package total	1700
Open Area	Open area package total	580

Note: You can reach more detailed table from Notification number 2023/36. Supported products vary.

Place and Date of Application

Applications are made to Provincial and District Directorates of Agriculture and Forestry and details can be followed from the website of Ministry of Agriculture and Forestry and relevant Notification (Notification No. 2023/36). Application date differs for each product.

Environmentally Based Agricultural Land Protection Program (ÇATAK)

Purpose of the Support

The purpose of this support is to protect soil and water quality, to ensure sustainability of natural resources, to prevent erosion and to reduce negative effects of agriculture.

Who can benefit from it?

Real or legal persons who carry out plant production in critical areas by using agricultural resources actually can benefit from this support.

Supported Items and Rates

Support is given to the producers once a year per decare in 3 categories for three years:

Support Subject	Support Amount (TL/da)
1st Category: To carry out agriculture with minimum tillage in areas where annual plants are produced	45
2nd Category: In order to prevent erosion by protecting soil and water structure; terrace, screening, stone picking, drainage, gypsum, sulphur, lime, mulching, fertilization, overgrazing prevention, carrying out at least two applications together such as covering the area with legumes except perennial poaceae or alfalfa or leaving the land empty with at least one	60
3rd Category: To use one of the suitable pressurized irrigation systems to minimize water use, to use environment friendly controlled pesticides and fertilizers, to carry out at least two or more of organic farming or good agricultural practices	135

Place and Date of Application

Applications are accepted by provincial/district directorates of the Ministry between March 1 and September 30.

Alternative Application Support for Areas with Potato Wart and Quarantine Line

Purpose of the Support

This support is given in order to support alternative practices recommended in areas where cultivation is banned because of potato wart.

Who can benefit from it?

Farmers registered in ÇKS can benefit from this support.

Subject and Rate of the Support

It is wanted to grow alternative products for consumption other than potato, seedlings, saplings or to fallow in contaminated areas that are found to be affected by potato wart and quarantined and quarantine line that are created by growing plant products other than potato and plants that are members of solanaceae family and production materials such as saplings, seedlings and tuber plants that will hold soil or by fallowing.

125 TL support is paid per decare. Support is paid once in three years.

Place and Date of Application

Farmers who want to benefit from the relevant support apply to provincial/district directorates where they have registered in ÇKS until 21/11/2022. Applications must be made within the relevant year and period. For detailed information, Notification No. 2022/32 should be checked.

Support for Water Usage Service Fee for Agricultural Irrigation Purposes

Purpose of the Support

This support is given with the aim of reducing production costs and ensuring continuity of agricultural production by supporting the water usage service fee of farmers.

Who can Benefit from It?

Farmers registered in ÇKS can benefit from this support.

Subject and Rate of the Support

50% of the water usage service fee determined by the irrigation unions is paid by farmers to the irrigation union. The remaining 50% of the water usage service fee is paid to the irrigation unions on behalf of the producers from the budget of the Ministry of Agriculture and Forestry.

Place and Date of Application

This support starts on 1/1/2023 and ends on 31/12/2023. For detailed information, Presidential Decree No. 7179 should be examined.

Support for Small Family Businesses' Producing Plants

With this support, 200 TL/decare is paid to small family businesses that are included in farmers register system and make plant production.

Purpose of the Support

With this support, it is aimed to support family businesses engaged in agricultural activities.

Who can benefit from it?

Enterprises that are registered in Farmers Register System (ÇKS) and whose agricultural land is 5 decares or less (more than 0.5 decare) in total can benefit from this support.

Supported Items and Rates

200 Turkish Lira family business support per decare is paid to real and legal persons cultivating fruit, vegetables, ornamental plants and medicinal and aromatic plants except for tea and hazelnut products in open area and/or greenhouse units.

Place and Date of Application

Farmers who want to benefit from the support apply to provincial/district directorates in the area where they are registered in Farmers Register System until 13/1/2023 from the date of publication of the relevant communication together with the petitions specified in the communication. For detailed information, Notification No. 2022/37 should be checked.

Other Statements Related to the Support

- Producers producing fruit, vegetables, ornamental plants and medicinal and aromatic plants in greenhouse units must be registered in Greenhouse Registration System (ÖKS).
- In case of more than one production in the main land/greenhouse units, support is given for only one production period.
- Support is not paid to enterprises with less than one decare of open production area and with 0,5 decare of greenhouse production area.
- If the lands whose share is more than five decares in the land registry is divided by means of renting and agricultural activity area becomes five decares or less, small family business support is not paid to these lands.

Supports for Fisheries and Fishing Boat

Supports for Fisheries

Support is paid directly to those who are engaged in aquaculture per kilogram/piece based on the amounts stated below provided that they are registered in fisheries registration system.

Support Item		(TL/kg-pcs)
Trout (above 50 tons/year capacity)	Up to 350,000 kg (including 350,000 kg)	1,00
Trout (under 50 tons/year capacity)	Up to 50,000 kg (including 50,000 kg)	1,50
Closed System Production	Up to 350,000 kg (including 350,000 kg)	2,00
Carp	Up to 350,000 kg (including 350,000 kg)	1,50
Mussel	Up to 350,000 kg (including 350,000 kg)	1,00

New Species (sturgeon, turbot, pagrus major, common seabream, common dentex, white grouper, sharpsnout seabream, shi drum, brown meager, white seabream, striped seabream, meagre, yellowtail, bluespotted seabream, catfish, shabout, African sharptooth catfish, eel, tilapia, crayfish, shrimp, leech, black sea salmon, red spotted trout)	Up to 350,000 kg (including 350,000 kg)	3,00
Support for Breeding Trout in Hatcheries (pcs)*	Up to 10,000 pcs (including 10,000)	60,00
Trout production over kilogram	Up to 350,000 kg (including 350,000 kg)	1,50
Fish farming in soil ponds	Up to 30,000 kg (including 30,000 kg)	2,00
DİTAP (kg)		0,25

- If there are more than one fishery enterprise belonging to same real or legal persons in the same potential area determined by the Ministry in the sea, same dam lake or dam lakes divided into regions, these enterprises are regarded as a single enterprise and support is paid accordingly.
- In products that are sold as fillets or smoked by being processed, twice the amount written in the invoices of the product is taken into consideration. For products that are cleansed from internal organs, 1.25 of the amount is taken into consideration.
- Breeders who want to benefit from the support should apply to the provincial/district directorate where the breeding facility is located until 23/12/2022.
- For detailed information, Notification numbered 2022/42 should be checked.
- *For the details and conditions about Support for Breeding Trout in Disease Free Hatcheries, Notification numbered 2022/43 should be checked. Applications must be made until 30/12/2022.

Supports for Processed Fisheries

Support is paid at the amount specified in the table below directly to producers that are registered in Fisheries Information System, engaged in aquaculture and sell their products to chain markets for consumption in the domestic market by processing and packaging them as frozen or cooled in processing and evaluation facilities approved by the Ministry.

Supports for Aquaculture		TL/kg
Support for increasing domestic consumption for processed fisheries	Up to 100.000 kg (including 100.000 kg)	2 TL

- Supported species are; Turkish Salmon, Trout, Bream, Bass, Carp, Meager and Tilapia.
- Making the processing of fishes through subcontractors and selling those fishes to chain stores is also within the scope of the support.
- Features and specifications of the product must be tagged on the packages.

- Applications are accepted at local directorates of the Ministry of Agriculture and Forestry.

Supports for Fishing Boat

Support is paid to those who will stop hunting with fishing boat at the amount depending on the boat size in exchange for stopping hunting with their fishing boat. Ministry is authorized to use these boats that will stop hunting and benefit from the support in any way.

Boat Length	(TL/meter)
10-20 meters	10.000
21-30 meters	15.000
31-34 meters	20.000
35-38 meters	30.000
39-45 meters	40.000
46 and older	45.000

In exchange for recording traditional coastal fishing and updating the data, ensuring sustainable management of it and collecting data determined by the Ministry, support is paid per boat at the amount specified for all fishing boats operating on inland waters and fishing boats smaller than 12 meters and operating on the seas. This support covers the years of 2023 and 2024. For detailed information, the Communiqué numbered 2022/56 should be examined. Boat owner or shareholder women are paid 25% more.

Boat Length	(TL/Number of boats)
0-4.99 meters of sea and inland water fishing boats	3,500
5-7.99 meters of sea and inland water fishing boats	4,250
8-9.99 meters of sea and inland water fishing	5,250
10-11.99 meters of sea fishing boats and 10 meters and longer inland water fishing boats	6,000

Place and Date of Application

Owners of fishing boats or their representatives who want to benefit from the support, apply to provincial/district directorates in the areas where their licenses were issued with documents and information requested in the annex of the Communication to be announced. Applications are made on the dates announced on the website of the General Directorate of Fisheries and Aquaculture.

Supports for Participation in Agricultural Consultancy System and Registration in Farm Accounting Data Network System

Agricultural Extension and Consultancy

Purpose of the Support

It is aimed to support organizations and persons that provide agricultural consultancy services to agricultural enterprises in order to ensure that system has a pluralistic, effective and efficient structure with support for agricultural extension and consultancy.

Who can benefit from it?

Free agricultural consultants, producer organizations and chambers of agriculture that employ consultants to serve agricultural enterprises can benefit from this support.

Within the scope of the support, agricultural enterprises that will receive agricultural consultancy services must be registered in relevant official registration systems and must meet at least one of the following criteria:

- 1) To carry out production in at least two decares of greenhouse area.
- 2) To carry out production in at least ten decares of vineyard-garden.
- 3) In field agriculture; to carry out production in at least one hundred decares of dry field or at least one hundred decares of dry and wet field on condition that more than half of it is dry and at least fifty decares of wet field.
- 4) In livestock; to have at least twenty cattle in dairy farms provided that ten of them are dairy cattle, at least fifty cattle in fattening cattle enterprises provided that there are at least twenty male animals and at least one hundred ovine animals in ovine breeding.
- 5) To have at least thirty bee colonies in bee keeping.
- 6) To have a aquacultural production facilities.
- 7) In poultry farming; to carry out farming at capacities of 5000 pieces in egg production, 10.000 pieces and more in meat production.
- 8) In organic farming, to have half of the operational sizes specified in paragraphs (1), (2), (3), (4), (5) and (7).

Supported Items and Rates

144,000 TL is paid from 2024 agricultural support budget in two equal parts depending on twelve-month service provision for freelance agricultural consultants who provide agricultural extension and consultancy services by being authorized by the Ministry and for each agricultural consultant employed in the chamber of agriculture and producer organizations. An organization can benefit from support for maximum 5 consultants employed within its structure. Eligible expenses consist of personnel, office, material and other expenses. All of the support paid to the chamber of agriculture and producer organizations is used only as agricultural consultancy fee, tax and insurance expenses related to the fee and other expenses of agricultural consultancy activities are covered by the resources of the organization.

Place and Date of Application

Organizations that want to benefit from this support apply to district directorate in the area where agricultural consultancy service office is located or to the provincial directorate in the area where district directorate is not present, with necessary documents within ten (10) days from the publication of the relevant support communication. For detailed information, Notification numbered 2023/48 should be examined.

Farm Accounting Data Network System

Purpose of the Support

With this support, it is aimed to support agricultural enterprises that are voluntarily included in Farm Accounting Data Network (ÇMVA) system, share and update data.

Who can benefit from it?

Payments are made to agricultural enterprises that are registered in Farmers Register System (ÇKS) and/or any administrative registration system created by the Ministry, that are included in ÇMVA

system, that share accounting data related to their agricultural activities with data collectors in a specified period during an accounting year and whose data is sent to the Responsible Unit.

Supported Items and Rates

1,000 TL participation support is paid per business in a year.

Place and Date of Application

Applications are made to Provincial Directorates of Agriculture and Forestry. Applications are always active. For detailed information, Notification numbered 2022/45 should be checked.

Supports for Agriculture Insurance

Purpose of the Support

With support for agriculture insurance, it is aimed to provide a certain amount of insurance support in order to compensate and secure losses that producers may suffer because of certain risks.

Who can benefit from it?

Producers who want to benefit from this support must be registered in systems such as Farmers Register System (ÇKS), Greenhouse Registration System (ÖAKS), Livestock Information System (HAYBİS), Fisheries Registration System (SKS) depending on the content of the support.

Supported Items and Rates

Supported Fields	Support Amount
Government Sponsored Plant Product Insurance*	50% of the premium written in the policy
Government Sponsored Greenhouse Insurance	
Government Sponsored Bovine Life Insurance	
Government Sponsored Ovine Life Insurance	
Government Sponsored Poultry Life Insurance	
Government Sponsored Bee Keeping (Hive with Bees) Insurance	
Government Sponsored Fisheries Insurance	

*For rose for oil, artichoke, fruit types grown in open area, sugar beet, pumpkin seeds for snacks, tomato, pepper, eggplant products, melon, watermelon fruit and vineyard seedlings additional premium support is provided at the rate of 1/3 for only against frost risk.

For detailed information, Presidential Decree No. 8015 should be examined. In addition, rate of support provided in village based drought yield insurance is 60%.

Supported Costs

Plant Product Insurance

For plant products, full hail package is created with additional storm, hurricane, fire, landslide, earthquake, flood, vehicle crash, harms given by wild boar to field crops, vegetables and strawberry products and frost damage to be paid as replanting cost risks together with main hail risk. In addition to these risks, optionally;

- Frost risk for rose for oil and fruit types grown in open field,
- Anti hail nets, cover and support (wired finish) systems and products under these systems against hail weight, natural disasters and vehicle crash risks,
- Rain risk for cherry, fig and grape products,

- d) Frost damage to be paid as replanting costs in sugar beet, squash, tomato, pepper, eggplant, watermelon and melon products,
 - e) Hot weather risk for grapefruit, tangerine, orange and grape can be guaranteed by Agriculture Insurance Pool.
- With village based drought yield insurance, in wheat, barley, rye, oat, triticale, chickpeas, red lentils and green lentils grown in dry agricultural areas and certified seeds of these products, yield decreases because of frost, hot wind, heat wave, excessive humidity, excessive precipitation risks outside of hail package are guaranteed by Agriculture Insurance Pool within the scope of the relevant general conditions and tariffs and instructions by considering personal, product and land information of the farmers registered in Farmers Register System.

Greenhouse Insurance

- Earthquake, vehicle crash, storm, hurricane, fire, landslide, flood, snow and hail weight risks can be guaranteed together with main hail risk in accordance with the result of risk analysis and assessment for greenhouse building materials, technical equipment and plant products grown in the greenhouse.
- In order for farmers to make insurance transactions, first of all, they must update information related to greenhouse and products in there for that year in Greenhouse Registration System.
- Farmers who have updated their records apply to insurance companies or agencies that are members of Agriculture Insurance Pool (TARSiM) to have their products insured.

Bovine Life Insurance

- Death risk for registered bovine animals and optionally, additional theft, terrorism or similar risks are guaranteed by Agriculture Insurance Pool by considering current facility, enterprise and breeding information within the scope of relevant general conditions and tariffs and instructions.
- To have their bovine animals that are registered in Livestock Information System (HAYBiS) insured, breeders apply to insurance company or agency that is member of Agriculture Insurance Pool (TARSiM).

Ovine Life Insurance

- Death risk for registered ovine animals and optionally, additional theft, terrorism or similar risks are guaranteed by Agriculture Insurance Pool by considering current facility, enterprise and breeding information within the scope of relevant general conditions and tariffs and instructions.
- To have their sheep, goats, rams or male goats that are registered in Livestock Information System (HAYBiS) insured, breeders apply to insurance company or agency that is member of Agriculture Insurance Pool (TARSiM).

Poultry Life Insurance

- Death risk for poultry that is raised in facilities that are registered in the Ministry's registration systems, produce in closed system and where biosafety and hygiene measures are taken and death risk for poultry raised in open and semi-open systems are guaranteed by considering current facility, enterprise and breeding information within the scope of relevant general conditions and tariffs and instructions.

Fisheries Life Insurance

Disease risk for fisheries in seas and inland waters, uncontrolled pollution and poisoning, predator attacks, storm, hurricane, earthquake, flood, accidents and algae risks can be insured. Optionally;

- Accidents, predator attack, storm, tornado, earthquake, flood and flood risk for cages and nets,
- Theft risk for fisheries, cages and nets can be insured.

Bee Keeping (Hive with Bees) Insurance

- Modern and active hives (with bees inside) that are registered in Bee Keeping Registration System (AKS) and that have plates, are covered by the insurance.
- With this insurance, active hives (with bees inside) are insured against damages caused by storm, hurricane, fire, landslide, earthquake, vehicle crash, flood, wild animal attack, crash, collision, tipping, burning, etc. during the transportation of hives.

Costs that are not supported

Facilities, enterprises, products and risks that are not deemed appropriate to be insured by Agriculture Insurance Pool as a result of the risk analysis, can't be insured.

Place and Date of Application

Place of application for this support which is open all year round, is insurance companies or agencies that are members of Agriculture Insurance Pool (TARSİM). In order for the producer to carry out insurance transactions, land and product information of that year must be updated in Farmers Register System (ÇKS) and other relevant registration systems.

Other Statements Related to the Support

Optional additional guarantees can't be taken alone.

Full damages caused by hail, storm, hurricane, fire, earthquake, landslide, flood, vehicle crash and snow weight risks on fruit trees and vineyards and their saplings becoming fruitful, can be insured with or independently from the product.

Research and Development Support

Purpose of the Support

In priority issues needed by the Ministry of Agriculture and Forestry and agricultural sector, this support aims:

- To develop private sector's R&D culture and capacity,
- To develop new species, varieties, technologies, models, products, etc.
- To transfer outputs to farmers and agricultural industrialists.

Who can benefit from it?

Universities, TÜBİTAK R&D units, non-governmental and professional organizations and private sector can apply for this support. Real persons, sole proprietorships and ordinary partnerships cannot apply for a project.

Research Subjects and Support Amount

The upper limit of support is 300,000 TL for universities, TÜBİTAK R&D units and 3,000,000 TL for private sector. The support rate is 100% for universities and TÜBİTAK R&D units and 70% for private sector, vocational and non-governmental organizations.

R&D priority areas for 2023 are shown in tables below. For detailed tables, website of TAGEM should be visited.

Prioritized R&D Areas
Agricultural Mechanization
Soil, Fertilizer and Water Resources
Animal Health
Plant Health
Livestock and Aquaculture
Food and Feed
Farm Plants
Garden Plants

Agricultural Economy Areas
Researching the Contribution of TAGEM's R&D and Innovation Activities to the National Economy
Impact Analyses of Rural Development Investments Support Program (KKYDP) Projects
Developing a Policy to Identify Waste and Losses in the Value Chain in Agricultural Production
Dissemination of Agricultural Innovations and Evaluation of the Impact of Dissemination Projects on Target Groups
Evaluation of Livestock Specialized Organized Industrial Zones in Terms of Clustering Model
Examining Agricultural Organizations in Terms of Production, Marketing, Employment and Economics and Developing an Appropriate Organization Model
Evaluation of the Institutional Capacity of Research Institutes Affiliated to TAGEM

Supported Costs

- Tools, machines, equipment, software, hardware (except for commercial production)
- Rental costs for agricultural tools and equipment
- Consumable material purchases (except for quantities that can be used for commercial production)
- Seed, pesticide, fertilizer, hormone and similar input purchases required by the research
- Survey, test, analysis, econometric modeling, design and purchase of service
- Device, equipment, greenhouse and similar maintenance and repair expenses used in the project
- Registration, patent and certification expenses

Costs that are not supported

- All kinds of capital usage costs, promotional materials, marketing and commercial advertising expenses
- Project preparation, application and contract costs, development and final reports and printing costs related to them
- Costs of converting project results into commercial practice (except for registration, patent and certification costs)
- Heating, lighting, communication and water expenses
- Construction and infrastructure expenses
- Money to be paid to personnel
- Financial service costs
- Building, land purchases and renting
- Items financed by another funding source
- Overseas/domestic travel expenses
- Vehicle purchase

- Labor prices
- Organization expenses
- Consulting and training fees
- Media device purchases (computer, camera etc.)
- Other expenses that are not directly or indirectly related
- Agricultural tool and equipment purchases
- Transportation expenses
- Travel (transportation, participation, accommodation) expenses for meetings, conferences, symposiums and similar places related to the project
- Car rental expenses

Place and Date of Application

On behalf of the Ministry, the General Directorate of Agricultural Research and Policies (TAGEM) handles the applications and arrangements for the R&D Support Program. Application documents can be found on the TAGEM page. Support calls are made once every calendar year.

The deadline for application is 16 June 2023 and the TAGEM page of the Ministry of Agriculture and Forestry should be followed for announcements and details.

Other Statements Related to the Support

- Except for universities and TÜBİTAK R&D Units, institutions/organizations can apply with only one project as coordinator during the call period.
- Turkish citizens who have at least masters or 5 years bachelor's degree can take part as a project coordinator.
- Project implementation period is maximum 36 months. Project period can be extended for a maximum one year.
- In the applications to be made for the projects under the title of "Agricultural Economy", there is no project partner requirement.
- Universities and TÜBİTAK R&D units must partner with at least one private sector eligible to apply for the support program in order to apply as an executive institution / organization. After this partnership requirement is met, other institutions/organizations can also take part in the project as partners.
- Private sector, non-governmental and professional organizations must partner with at least one institute in order to apply for the support program as an executive institution/organization. After this partnership requirement is met, other institutions/organizations can also take part in the project as partners.
- Advance payments are not made.
- In private sector applications, in cases where 70% of the project budget is equal to or below the support upper limit, the amount of support that can be given to the project cannot be more than the turnover totals of the private sector itself and/or the project partner.
- For detailed information, notification numbered 2023/6 should be examined.

Supports of Agriculture and Rural Development Support Institution IPARD

IPARD is Rural Development component of the Instrument for Pre-Accession Assistance (IPA) created by European Union (EU) to support candidate and potential candidate countries.

Source of financial support to be provided to beneficiaries is IPARD Program Fund consisting of co-financing of EU and Republic of Türkiye. This support is called "Public Contribution". Public contribution is used free of charge for investments made within the framework of the program.

101-1 Investment Program for Enterprises Producing Milk

Purpose of the Support

With this support, it is aimed to improve general performance of dairy plants and to increase their competitiveness, to protect environment and to comply with EU standards regarding animal welfare.

Who can benefit from it?

Real and legal persons that are registered in Farmers Register System or National Animal Registration System except for public entities can benefit from this support.

Subjects and Rates of Investment

Projects at the amount between 5.000 and 500.000 Euros are supported at the rate of 60%. Support rate is 70% for producer organizations and legal persons for which producer organization is controlling shareholder. Exchange rate of Euro is determined as 1 Euro = 28.4788 TL.

Enterprises that produce milk and want to benefit from the project shouldn't exceed capacity limits stated below at the end of the investment:

- Minimum 10, maximum 120 milk cows or
- Minimum 5, maximum 50 milk buffaloes or
- Minimum 5, maximum 500 milk sheep/goats

Support rate increases by 5% if the applicant is under 40 years old, 5% if the investment is carried out in the mountainside and 10% if both conditions are fulfilled together.

Supported Costs

Machine and equipment purchases, visibility expenses, service and consultancy expenses are supported. Eligible expenses are exempt from tax.

Costs that are not supported

Construction works, land/building purchase, second hand machine and equipment purchase, rent expenses, operating expenses, animal purchase, tax maintenance/amortization expenses and insurance expenses are among ineligible expenses.

Place and Date of Application

Applications are accepted by Provincial Coordinatorships of Agriculture and Rural Development Support Institution between 4-28 September 2023 and detailed information about support is provided through website of the institution.

Other Statements Related to the Support

- It is necessary to prove that enterprise sells milk.
- Public entities and legal persons with more than 25% public share are not eligible.

- If applicant is a real person, he mustn't be older than 65 years old and if it is a legal person, person who is authorized to represent and bind mustn't be older than that age.
- Applicant must have a high school or higher diploma in agriculture, veterinary medicine or other relevant specialization or be able to provide a service scheme stating that he has worked in the project related activity branch for at least 3 years.
- Purchase of machine and equipment for renewable energy is within the scope of the support.
- 10% is added to support rate of expenses related to waste storage and waste management.
- If investment is made in rented property, 5 years of rent term is required after investment is completed.
- Applicants are obliged to ensure that investment is maintained for 5 years after the last payment is made by ARDSI and it is not changed.
- On the date when final payment request is made, applicants must be registered in National Animal Registration System.
- At the end of the investment period, supported investments must comply with the relevant EU standards on animal welfare and environmental protection that are related to scope of the investment.
- Applicant can't apply for more than one project in the same application call period.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 7 months.
- Drawings related to construction works will not be supported under service expenses within the scope of the call.

101-2 Investment Program for Agricultural Enterprises Producing Red Meat

Purpose of the Support

With this support, it is aimed to improve general performance of meat enterprises and to increase their competitiveness, to protect environment and to comply with EU standards regarding animal welfare.

Who can benefit from it?

Real and legal persons that are registered in Farmers Register System or National Animal Registration System except for public entities can benefit from this support.

Subjects and Rates of Investment

Projects at the amount between 5.000 and 500.000 Euros are supported at the rate of 60%. Support rate is 70% for producer organizations and legal persons for which producer organization is controlling shareholder. Exchange rate of Euro is determined as 1 Euro = 28.4788 TL.

Enterprises that produce red meat shouldn't exceed capacity limits stated below at the end of the investment:

- Minimum 30, maximum 250 cattle or
- Minimum 10, maximum 50 buffaloes or
- Minimum 100, maximum 500 sheep/goats

For new enterprises and existing agricultural enterprises that increase capacity, support rate is 40%.

Support rate increases by 5% if the applicant is under 40 years old, 5% if the investment is carried out in the mountainside and 10% if both conditions are fulfilled together.

Supported Costs

Machine and equipment purchases, visibility expenses, service and consultancy expenses are supported. Eligible expenses are exempt from tax.

Costs that are not supported

Construction works, land/building purchase, second hand machine and equipment purchase, rent expenses, operating expenses, animal purchase, tax maintenance/amortization expenses and insurance expenses are among ineligible expenses.

Place and Date of Application

Applications are accepted by Provincial Coordinatorships of Agriculture and Rural Development Support Institution between 4-28 September 2023 and detailed information about support is provided through website of the institution.

Other Statements Related to the Support

- Applicants are obliged to ensure that investment is maintained for 5 years after the last payment is made by ARDSI and it is not changed.
- Public entities and legal persons with more than 25% public share are not eligible.
- If applicant is a real person, he mustn't be older than 65 years old and if it is a legal person, person who is authorized to represent and bind mustn't be older than that age.
- Applicant must have a high school or higher diploma in agriculture, veterinary medicine or other relevant specialization or be able to provide a service scheme stating that he has worked in the project related activity branch for at least 3 years.
- Purchase of machine and equipment for renewable energy is within the scope of the support.
- 10% is added to support rate of expenses related to waste storage and waste management.
- If investment is made in rented property, 5 years of rent term is required after investment is completed.
- On the date when final payment request is made, applicants must be registered in National Animal Registration System.
- At the end of the investment period, supported investments must comply with the relevant EU standards on animal welfare and environmental protection that are related to scope of the investment.
- Applicant can't apply for more than one project in the same application call period.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 7 months.
- Drawings related to construction works will not be supported under service expenses within the scope of the call.

101-3 Investment Program for Agricultural Enterprises Producing Poultry Meat

Purpose of the Support

With this support, it is aimed to improve general performance of enterprises producing poultry meat and to increase their competitiveness, to protect environment and to comply with EU standards regarding animal welfare.

Who can benefit from it?

Real and legal persons that are registered in Farmers Register System or National Animal Registration System except for public entities can benefit from this support.

Subjects and Rates of Investment

Project is supported at the rate of 60%. Support rate is 70% for producer organizations and legal persons for which producer organization is controlling shareholder. Upper and lower eligible expense limits for each investment are as follows. Exchange rate of Euro is determined as 1 Euro = 28.4788 TL.

- Minimum 5.000 Euros and maximum 250.000 Euros for broiler and turkey sectors
- Minimum 5.000 Euros and maximum 125.000 Euros for goose sector

Agricultural enterprises that produce poultry meat shouldn't exceed capacity limits stated below at the end of the investment:

- Minimum 5.000, maximum 50.000 broilers or
- Minimum 1.000, maximum 8.000 turkeys or
- Minimum 350, maximum 3.000 geese

While active existing enterprises that don't include capacity increase in "broiler" applications are within the scope of the support, new enterprises are out of the scope of the support in Konya.

New and existing enterprises (including capacity increase) are supported in Konya province in applications to be made for turkey and goose.

Support rate increases by 5% if the applicant is under 40 years old, 5% if the investment is carried out in the mountainside and 10% if both conditions are fulfilled together.

Supported Costs

Machine and equipment purchases, visibility expenses, service and consultancy expenses are supported. Eligible expenses are exempt from tax.

Costs that are not supported

Construction works, land/building purchase, second hand machine and equipment purchase, rent expenses, operating expenses, animal purchase, tax maintenance/amortization expenses and insurance expenses are among ineligible expenses.

Place and Date of Application

Applications are accepted by Provincial Coordinatorships of Agriculture and Rural Development Support Institution between 4-28 September 2023 and detailed information about support is provided through the website of the institution.

Other Statements Related to the Support

- Public entities and legal persons with more than 25% public share are not eligible.
- If applicant is a real person, he mustn't be older than 65 years old and if it is a legal person, person who is authorized to represent and bind mustn't be older than that age.
- Applicant must have a high school or higher diploma in agriculture, veterinary medicine or other relevant specialization or be able to provide a service scheme stating that he has worked in the project related activity branch for at least 3 years.
- Purchase of machine and equipment for renewable energy is within the scope of the support.
- 10% is added to support rate of expenses related to waste storage and waste management.

- If investment is made in rented property, 5 years of rent term is required after investment is completed.
- Applicants are obliged to ensure that investment is maintained for 5 years after the last payment is made by ARDSI and it is not changed.
- On the date when final payment request is made, applicants must be registered in National Animal Registration System.
- At the end of the investment period, supported investments must comply with the relevant EU standards on animal welfare and environmental protection that are related to scope of the investment.
- Applicant can't apply for more than one project in the same application call period.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 7 months.
- Drawings related to construction works will not be supported under service expenses within the scope of the call.

101-4 Investment Program for Agricultural Enterprises Producing Eggs

Purpose of the Support

With this support, it is aimed to improve general performance of enterprises producing eggs and to increase their competitiveness, to protect environment and to comply with EU standards regarding animal welfare.

Who can benefit from it?

Real and legal persons that are registered in Farmers Register System or National Animal Registration System except for public entities can benefit from this support.

Subjects and Rates of Investment

Projects at the amount between 5.000 and 500.000 Euros are supported at the rate of 60%. Support rate is 70% for producer organizations and legal persons for which producer organization is controlling shareholder. Exchange rate of Euro is determined as 1 Euro = 28.4788 TL.

Enterprises that produce eggs shouldn't exceed capacity limits of minimum 20.000 and maximum 100.000 layer hens at the end of the investment.

Only existing agricultural enterprises that are active in egg production and fulfill the following conditions are eligible provided that they don't increase their capacities:

- Enterprises that need renewal in their facilities and equipment
- Enterprises carrying their facilities away from residential areas (in the same province)
- Those expanding buildings in order to fulfill animal welfare conditions without increasing the capacity

Support rate increases by 5% if the applicant is under 40 years old, 5% if the investment is carried out in the mountainside and 10% if both conditions are fulfilled together.

Supported Costs

Machine and equipment purchases, visibility expenses, service and consultancy expenses are supported. Eligible expenses are exempt from tax.

Costs that are not supported

Construction works, land/building purchase, second hand machine and equipment purchase, rent expenses, operating expenses, animal purchase, tax maintenance/amortization expenses and insurance expenses are among ineligible expenses.

Place and Date of Application

Applications are accepted by Provincial Coordinatorships of Agriculture and Rural Development Support Institution between 4-28 September 2023 and detailed information about support is provided through the website of the institution.

Other Statements Related to the Support

- If the enterprise is moved, existing agricultural enterprise must belong to the applicant and it must be in the same province.
- Public entities and legal persons with more than 25% public share are not eligible.
- If applicant is a real person, he mustn't be older than 65 years old and if it is a legal person, person who is authorized to represent and bind mustn't be older than that age.
- Applicant must have a high school or higher diploma in agriculture, veterinary medicine or other relevant specialization or be able to provide a service scheme stating that he has worked in the project related activity branch for at least 3 years.
- Purchase of machine and equipment for renewable energy is within the scope of the support.
- 10% is added to support rate of expenses related to waste storage and waste management.
- If investment is made in rented property, 5 years of rent term is required after investment is completed.
- Applicants are obliged to ensure that investment is maintained for 5 years after the last payment is made by ARDSI and it is not changed.
- On the date when final payment request is made, applicants must be registered in National Animal Registration System.
- At the end of the investment period, supported investments must comply with the relevant EU standards on animal welfare and environmental protection that are related to scope of the investment.
- Applicant can't apply for more than one project in the same application call period.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 7 months.
- Drawings related to construction works will not be supported under service expenses within the scope of the call.

103-1 Milk and Milk Products Processing and Marketing Program

Purpose of the Support

With this support, it is aimed to install new milk collection centers and enterprises processing milk and to modernize existing ones and to install new whey processing facilities.

Who can benefit from it?

All legal and real persons that are defined as small and medium sized enterprises are defined as eligible beneficiaries.

If the applicant is a legal person and company/real person, they must be member of Small and Medium Sized Enterprises Development and Support Organization.

Subjects and Rates of Investment

Project amount is between 30.000 and 3.000.000 Euros for enterprises processing milk and whey and it is between 30.000 and 1.000.000 Euros for milk collection centers. Support rate is 60% for producer organizations and legal persons for which producer organization is controlling shareholder (more than 50% of the partnership share) and 50% for real and legal persons. Exchange rate of Euro is determined as 1 Euro = 28.4788 TL.

At the end of the investment, enterprises processing milk and whey should have minimum 10 tons of daily capacity. There are no upper and lower limits for milk collection centers.

At the end of the investment period, investment must meet occupational safety, EU hygiene (except for raw milk) and structural standards (based on EC 852/2004, EC 853/2004) and EU environment standards.

Supported Costs

Machine and equipment purchases, visibility expenses, service and consultancy expenses are supported. Eligible expenses are exempt from tax.

Refrigerated vehicle (motor vehicle with cooling tank/body) are also included in the scope of the support.

Costs that are not supported

- Applicant can't apply for more than one project in the same application call period.
- Provision of rental machine equipment for which support is requested to members by producer organization for common use is aimed.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 12 months.

302-7 Renewable Energy Investments

Purpose of the Support

With this support; eligible beneficiaries can establish facilities to produce the energy they need.

Who can benefit from it?

- Farmers or members of farm households that diversify their activities inside or outside of the farm,
- Real persons in rural areas,
- Natural, legal persons in rural areas can benefit from it.

Investments within the scope of this activity must be in rural areas regardless of the applicant's status. The applicant must have an active consumption facility in the same province.

Supported Items and Rates

It includes investments to be made for electricity and heat generation. Upper and lower eligible expense limits for investments within this scope are minimum 5.000 Euros and maximum 500.000 Euros. Exchange rate of Euro is determined as 1 Euro = 14.31 TL. Support rate is 55% of the expense amount. Support rate is 65% for producer organizations and legal persons for which producer organization is controlling shareholder.

All kinds of renewable energy activities (except for hydroelectricity) for electricity and heat generation purposes including below mentioned ones are eligible:

- Photovoltaic solar energy systems
- Concentrate solar energy systems
- Wind energy systems
- Geothermal, biomass, microgeneration systems

Within the scope of the support, energy investments up to 5 MW capacity will be supported. This amount has been determined as 100 kWe for micro-cogeneration.

If investment aims to generate electricity from renewable energy sources, it must be connected to the national grid.

Supported Costs

Construction works, machine, software and equipment purchases, visibility expenses, architecture, engineering and consultancy expenses, general expenses for obtaining license and patent rights are supported. Eligible expenses are exempt from tax.

Costs that are not supported

Purchase of land and existing buildings, purchase of second-hand machines and equipment, all taxes, operating expenses, maintenance and amortization expenses, all kinds of rent expenses are ineligible expenses.

Place and Date of Application

Applications are accepted by Provincial Coordinatorships of Agriculture and Rural Development Support Institution between June 19 – March 25, 2022 and detailed information about support is provided through website of the institution.

Other Statements Related to the Support

- Applicant mustn't be older than 65 years old.
- Applicants mustn't have any tax and social security debts.
- If investment is made in rented property, 5 years of rent term is required after investment is completed.
- Applicants are obliged to ensure that investment is maintained for 5 years after the last payment is made by ARDSI and it is not changed.
- In investments where total value of eligible expenses is 500.000 TL or less, payment is made in one installment and in investments where such amount is more, it is paid in two installments.
- Applicant can't apply for more than one project in the same application call period.
- Investment periods in the activities to be carried out within the scope of the project are planned as maximum 12 months.
- In the ranking criteria, 15 additional points are given when applicant is producer organizations and legal persons for which producer organization is controlling shareholder.

KOSGEB Supports

Entrepreneurship Development Support Program

Purpose of the Support

This program is carried out in a way to include various sectors in many fields in order to support entrepreneurship, make it widespread and establish successful businesses and it consists of two main scopes:

- Entrepreneurship training
- Entrepreneurship Development Support

In accordance with general target of expanding the culture of entrepreneurship and establishing successful businesses in the country, Entrepreneurship Trainings are organized for entrepreneurs in order to enable them to have knowledge and skills for starting and running a business, to become aware of their roles and responsibilities in this process and to gain knowledge and experience so that they can prepare a business plan for their own business ideas. Entrepreneurship Trainings are free and open to general participation and take minimum 32 hours.

Participants who complete Entrepreneurship Training and obtain entrepreneurship certificate can benefit from Entrepreneurship Development Support. Trainings are carried out online through internet.

Who can benefit from it?

Entrepreneurship Training must be completed to benefit from Entrepreneurship Development support. In addition:

- Enterprise established by the entrepreneur must be an enterprise that has been established in the last 1 year,
- Entrepreneur mustn't have other business that has been established in the last 3 years in the status of real person and mustn't have partnership in a company which is more than 30% and above,
- Share of the entrepreneur in the business he established must be minimum 50%,
- In the support process of the entrepreneur, he mustn't work in another enterprise/institution/organization by being subject to provisions of SSI.

Supported Subjects and Rates

Support is divided into two groups as Traditional Entrepreneur Support and Advanced Entrepreneur Support.

Traditional Entrepreneur Support

Target of the Traditional Entrepreneur Program is to support enterprises in the year of establishment and to promote employment in these enterprises.

Establishment Support	5.000 TL for enterprises established with real person status
	10.000 TL for enterprises established with stock corporation status
Certificate Support	5.000 TL for necessary documents such as occupational and technical certificates etc.

Support Subject	1 st Performance Period Total Premium Days*	2 nd Performance Period Total Premium Days*
Performance Support**	5.000 TL to enterprise with 180-539 days 10.000 TL to enterprise with 540-1079 days 20.000 TL to enterprise with 1080 and more days	5.000 TL to enterprise with 360-1079 days 15.000 TL to enterprise with 1080-1439 days 20.000 TL to enterprise with 1440 and more days

*The first period covers the period until the end of the first year, the second period covers the period until the end of the second year.

**If entrepreneur is young, female, disabled, veteran or martyr's first degree relative, 5.000 TL is added to the amounts determined for each performance period.

Advanced Entrepreneur Support

Target of Advanced Entrepreneurship Program is to increase the number of innovative, middle-high and high technology sectors and enterprises that are active in the manufacturing sector in accordance with strategic priorities of our country. In addition to traditional entrepreneurial supports, supports specified in the table are also given within the scope of this support.

Advanced Entrepreneur Machine Equipment, Software and Consultancy Support	Support Amount	Support Rate
Middle-Low and Low Technology Level	100.000 TL	75% (If Domestic Good, 90%)
Middle-High Technology Level	200.000 TL	
High Technology Level	300.000 TL	
Consulting and Enterprise Coaching Support	10.000 TL	75%

Place and Date of Application

Applications are always active and it must be applied to KOSGEB. Registrations for training are made through internet.

Other Statements Related to the Support

- Second hand machines and equipment to be purchased within the scope of the project must be maximum 3 years old.
- Machines and equipment purchased within the scope of the project can't be rented or handed over for 2 years.
- Entrepreneur must have minimum 50% of founder share in the enterprise to be established.

Municipality Supports

Municipality's Agricultural Support

Purpose of the Support

It is aimed to give support to some products determined in order to improve rural development and plant production throughout Konya province.

Who can benefit from it?

Applicant must be older than 18 years old, registered to the farmers database and reside in Konya.

Those who benefited from the support in previous years can't benefit from the same product support.

Supported Items and Rates

Table related to the products planned to be supported in 2023 and support amounts and rates is as follows. Supports are given as grants with 50% (85% ratio items are shown in the chart) ratio. Also, products that are planned to be supported next year are announced on the municipality's website.

Support Subject	Support Amount
Apple	1 decare 70 pcs - 2 decares 140 pcs - 3 decares 210 pcs - 4 decares 280 pcs - 5 decares 350 pcs
Vine Sapling	1 decare 150 pcs - 2 decares 300 pcs - 3 decares 450 pcs - 4 decares 600 pcs - 5 decares 750 pcs

Other Statements

- Total upper loan limit which can be provided to the producers requesting loan for more than one production field is determined in accordance with product with the highest loan limit among products related to the loan.
- Insurance related assets in the investments made by using loan within the scope of this practice (barns, coops, animals, etc.) and agricultural products must be insured based on the loan amount.
- Priority regions are determined on a provincial basis. For details, see communication number 2020/4.
- In order to benefit from idle enterprise criterion, livestock enterprise to be purchased by loan must be inactive for a minimum of one year.
- Minimum animal capacity is required in animal investment subjects. Required capacities are 50 for bovine animals, 200-250 for ovine animals, 10 thousand for chickens, 50 hives for bee keeping. Minimum capacity for other poultry animals varies according to species.
- In order for the producers to use interest discounted loans for strategic plant production; safflower, sunflower for oil, grain corn, rapeseed, soybean, sesame, olive for oil and medicinal

aromatic plants (thyme, rose for oil, lavender for oil, lemon balm, ginger, sahle, rosemary, sage, sweetgum oil, sumac, carob, laurel, basil, blueberry, aronia, linden, saffron and jojoba) must be grown.

- Real and legal person businesses that will benefit from the loans under "Processing of Agricultural Products" must be at the scale of "micro business" or "small business".
- For detailed information, see communication no 2020/4, Presidential Decisions no 8038 and 8039.

Credit Guarantee Fund (KGF)

After rating to be performed within the structure of KGF A.Ş., Credit Guarantee Fund provides guarantee for loans to be made available by the Bank for SMEs engaged in economic and commercial activities and tradesmen, artisans, self-employed members, cooperatives (excluding land and residential building cooperatives), farmers having these qualifications and real or legal persons having the qualifications specified in the Articles of Association of Credit Guarantee Fund.

Scope and Details

For SMEs in equity guarantees:

- Period for working capital loans is minimum 6 months, maximum 60 months, payment free period is maximum 1 year.
- Period for investment loans is minimum 6 months, maximum 84 months, payment free period is maximum 2 years.
- Period for benefiting from the guarantee is 1 year beginning from the date when Credit Guarantee Fund issues guarantee.
- Guarantee limit in favor of each beneficiary/group is maximum 3 million TL and maximum guarantee rate is 80%.

Important Note: Institutions that have protocols with KGF are KOSGEB, Ministry of Industry and Technology, Technology Development Foundation of Türkiye and TÜBİTAK. For the loans to be used under KGF guarantee, the term, rate and maximum amount of the guarantee may differ depending on the source used for the guarantee, the protocol made with the supporting institution and the characteristics of the beneficiary. Website should be checked for details.

Fee and Commission

- 2% guarantee commission is received in advance based on Credit Guarantee Fund's guarantee amount at the moment of providing loan for the first year and based on guarantee risk for every year in the following years.
- If the loan to be made available to the beneficiary is one of the corporate finance support loans such as Bank Overdraft/Rotating, Direct Debiting System, Participation Banks' Checking Account, guarantee commission is received in advance at the rate of 2% based on the guarantee limit of Credit Guarantee Fund for each year.
- It is received at the rate of 1% based guarantee amount in temporary and final guarantee letters for the commitment services.

Application conditions

Beneficiary must be a real or legal person possessing business with SME qualification.

Applications are made through banks under agreement.

General Directorate of Forestry Special Afforestation Supports

Purpose of the Support

This support is provided by the General Directorate in order to increase the forest area, to improve biodiversity and to reconstitute degraded forest ecosystem. It includes afforestation, erosion control, pasture improvement, rehabilitation, nursery, tree breeding, seed and sapling production and development-improvement works.

Who can benefit from it?

Real and legal persons can benefit from this support if they fulfill the relevant conditions.

Terms of the Support

Grant is given to real and legal persons by the General Directorate as foreseen in the Regulation on Afforestation and Erosion Control Services for tree and shrub species producing essential or non-wood forest products in degraded forest areas, openings in the forest, in treasury lands, in lands owned by the State and in owned lands and for special reforestation and special development-improvement works they do and private forest nurseries according to approved application project.

Grant at the amount of 65% of the amount of grant based investment expenses table may be given to real persons who are registered in the forest village population and reside in that village for tree and shrub species producing non-wood forest products in degraded forest areas, openings in the forest, in treasury lands, in lands owned by the State and in owned lands and for special reforestation and special development-improvement works they do up to 3 hectares just once according to approved application project. Grant at the amount of 25% of the amount of grant based investment expenses table may be given to real and legal persons who are not registered in the village.

Forest tree and shrub saplings may be given free of charge by the Regional Directorate at the amount specified in the approved application project for special erosion control works to be carried out by real or legal persons and special afforestation and special development-improvement works to be carried out without requesting a grant.

In special afforestation and special development-improvement works carried out by real or legal persons with trees and shrub species producing essential forest products in pure or mixed forms; grant up to 25% of total of costs and workmanship of wooden environing pile or equal arm (L) or (T) figured iron fence post, barbed wire, connection or fixing materials, three-year maintenance and project construction costs may be given.

In special afforestation and special development-improvement works carried out by real or legal persons by using species producing non-wood forest products such as walnut, chestnut, pistachio, almond, carob, hawthorn, laurel, mahaleb, olive, rosehip and gumwood and fast growing forest tree and shrub species such as poplar, alder, eucalyptus, etc. in pure or mixed forms; grant up to 25% of total of environing, revitalization cut, land preparation, planting or sowing, seed, cutting for grafting, bud eye and grafting, sapling costs, drip irrigation facility cost, three-year maintenance and project construction costs may be given.

In the grant based investment expenses table included in their certified project and approved by Nursery Directorate for private forest nurseries to be established by real or legal persons; grant up to 25% of total of enviroing, drainage, leveling, greenhouse establishment, installation of outdoor irrigation installation, growing environment, growing container, tillage, production material, workmanship, three-year maintenance and project construction costs may be given.

In special afforestation and special development-improvement works to be carried out by persons registered in the forest village population and residing in that village by using tree and shrub species producing non-wood forest products; grant up to 65% of total of enviroing, revitalization cut, land preparation, planting or sowing, seed, cutting for grafting, bud eye and grafting, sapling costs, drip irrigation facility cost, three-year maintenance and project construction costs may be given.

Place and Date of Application

Applications for special afforestation and special development-improvement in state owned forests are made to the relevant directorates in 2 periods in April and September. For detailed information, it is necessary to contact relevant directorates.

Other Statements Related to the Support

In private forest nurseries for which grants are allocated, minimum fifty percent (50%) of saplings to be produced must be forest tree and shrub saplings and maximum fifty percent (50%) of them must be species producing non-wood forest products and ornamental plants.

Forestry and Village Relations Department ORKÖY Loans

Purpose of the Support

The purpose of Support Program for Development of Forest Villagers is to contribute to development of forest villagers and to reduce pressure on forests in order to achieve the objectives of conservation, development, operation and expansion of forests.

Who can benefit from it?

Forest villagers, cooperatives and cooperative higher organizations can benefit from this program. Forest villagers are required to have lived in villages at least for 1 year.

Scope of the Support

Loan upper limits are decided by the general directorate of forestry. Loans are given to the beneficiary without interest.

Loan Support for Individual Use

Supported areas are divided into two main categories as “Social” and “Economic” loans. These loans are 3-7 year credits. The grant rate for 2023 is 20%. For economic loans, a contribution of at least 10% of the project amount is required.

--------------------------------	---------	--------

Loan Support for Cooperatives

These loans are 3 to 8 years interest free credits. According to the project subject, equity contribution is required between 5 to 25 percent. Project subject and loan limits are determined specially by the Ministry.

Application Place

Applications are made online via e-devlet. Applications are accepted across the year.

Other Statements Related to the Support

- At least 10% of villager contribution is required for economic loans.
- Except micro loans for housewives, only one family member is given loan.
- Equity capital contribution at the amount of five percent (5%) of total project amount is sought in new projects related to non-wood forest products for economic purposes to be implemented by cooperative or cooperative higher organizations, at the amount of minimum ten percent (10%) of the project amount in other new investment projects and business capital projects with economic purposes and at the amount of minimum twenty five percent (25%) of the project amount in modernization and expansion projects. Land share can't exceed five percent (5%) of the project fixed investment amount.
- Cooperatives participating in the project must be established in forest villages.
- Equity contribution is not required for social project of cooperatives or higher cooperative institutions.
- Beneficiaries who pay their loans properly can have loans again.
- Investment period cannot exceed 3 years.
- In order to benefit from personal loans, it must be documented that they are forest villagers and not permanent workers/civil servants/tradesmen.
- With acceptable reasons, installments can be postponed one time for individuals for 12 months, two times for cooperatives (or higher cooperative bodies) for 15 months.

Export Restitution Supports for Agricultural Products

Purpose of the Support

The purpose of this support is to set off the amounts calculated by quantities and values of exported goods from the taxes, social security premiums, communication and energy expenses of exporters that they pay to public institutions.

Who can benefit from it?

Exporters of agricultural products can benefit from these supports.

Supported Items and Rates

Item Name	Export Restitution Amount	Amount Limit	Maximum Rate of Payment
Fowl meat (except offal)	430 TL/Ton	41%	14%
Egg	40 TL/1000 pcs	65%	10%
Honey	160 TL/Ton	20%	2%
Flowers and buds suitable for bouquet or decorative purposes	475 TL/Ton	45%	9%
Vegetables (uncooked, steamed or boiled)(frozen)	180 TL/Ton	45%	10%
Dried vegetables (full, cut, sliced, crushed or powder form but not prepared in another form)	800 TL/Ton	40%	10%
Fruits and stone fruits (uncooked, steamed or boiled, frozen)	175 TL/Ton	45%	6%
Olive oil	20 TL/Ton	100%	2%
Sausages and similar products produced from fowl meat and offal and products prepared with fowl meat or canned products	550 TL/Ton	50%	13%
Prepared or canned fish	550 TL/Ton	100%	5%
Chocolate and cocoa containing food preparations	270 TL/Ton	48%	5%
Pastas	150 TL/Ton	32%	9%
Biscuits, wafers, cakes	270 TL/Ton	18%	7%
Frozen fruits and vegetables and food materials based on fruit and vegetable processing industry	185 TL/Ton	100%	8%
Jam, jelly, marmalade, fruit or stone fruit purees and pastes	140 TL/Ton	35%	5%
Fruit juices and vegetable juices, fruit nectars	360 TL/Ton	15%	12%

Export Restitution Amount: Amount of payment to be made per physical quantity.

Amount Limit: It is the rate indicating portion that will be the basis for export restitution support on a product basis.

Maximum Rate of Payment: It is the rate determining the maximum payment to be made by considering export value of the product.

Place and Date of Application

Applications are made to the general secretariat of the Exporters' Association and applications are always active.

Incentives of Ministry of Industry and Technology

Government Supports within the Scope of Investment Incentive Certificate

Purpose of the Support

It is aimed to ensure higher and faster development of specific economical and social activities compared to others.

Supported Investments and Rates

Incentives are grouped in the following table in accordance with the investment type and minimum investment amount. Most of the investors engaged in agriculture have been provided general incentives if minimum investment amount is 3 million TL or higher.

Incentive Classification	GENERAL INCENTIVE	REGIONAL INCENTIVE
Incentive Scope	Covers all investments other than the investment fields which will not be supported.	Aims to reduce the development difference between provinces and increase production and export potential of them.
Minimum Investment Amount for Benefiting from the Incentive	3 million TL	3 million TL

INCENTIVE ISSUES		INCENTIVE SYSTEM		
		GENERAL	REGIONAL*	
			Out of an OIZ	Inside an OIZ
VAT Exemption		Yes	Yes	Yes
Customs Duty Exemption		Yes	Yes	Yes
Tax Reduction	Investment Contribution Ratio (%)**	No	20	25
	Discount Rate (%)***		55	60
SSI Premium Employee Share Support	Support Period	No	3 years	5 years
	Investment Contribution Ratio (%)*		15	20
Investment Place Allocation		No	Yes	No
Interest Support		No	No	No
VAT Refund		No	No	No

***Not:** Konya is rated as a second region city. If an investor invests in one of nineteen districts of Konya, this investment is regarded as a third region investment outside of OIZ and fourth region investment inside OIZ and it can benefit from higher incentive rates. District list is as follows: Kulu, Sarayönü, Hadim, Taşkent, Güneysınır, Hüyük, Kadınhanı, Doğanhisar, Tuzlukçu, Yalıhüyük, Bozkır, Derebucak, Altınekin, Çeltik, Yunak, Derbent, Halkapınar, Emirgazi, Ahırılı.

***Note:** There is a 15 points of discount in addition to investment contribution rates for the investment incentive certificates issued for the manufacturing industry (US-97 Code: 15-37) from 31/12/2019 to 31/12/2022.

****Note:** These discount rates for the investment incentive certificates issued for the manufacturing industry (US-97 Code: 15-37) from 31/12/2019 to 31/12/2022 will be 100%.

Other Statements Related to the Support

General investment incentive certificate may be issued for the investments providing the following minimum conditions:

- Minimum 150 bovines for integrated investments for meat-oriented, dairy-oriented and breeding bovines,
- 100.000 pcs/period for integrated poultry investments,
- 1.000 ovines/period for integrated dairy and meat-oriented ovine investments (including breeding stock),
- Dairy processing investments with 5 tons/day production capacity,
- Greenhousing investment larger than 5 decares.

Agricultural investments which can benefit from the regional supports provided for the second region including Konya are grouped by considering minimum investment amounts or capacities in the following table.

Sector	Minimum Investment Amount or Capacity
Integrated livestock investments including integrated breeding stock investments*	3 Million TL
Greenhousing	40 Decares

*Minimum capacity of 500 bovines is necessary for the dairy-oriented integrated bovine investments in the first and second regions, while 700 bovines/period for meat-oriented integrated bovine investments, 500 bovines for the bovine breeding stock integrated investments, 2.000 ovine for ovine breeding stock integrated investments, 2.000 ovine/period for dairy and meat-oriented ovine integrated investments and 200.000 pcs/period for integrated poultry investments (no capacity condition is necessary for integrated investments of breeding fowl stock).

Expense items supported based on the investments are presented in the following table:

Expense Item	Is it an Eligible Expense Item within the scope of an Incentive Certificate?	Can It Benefit from VAT Exemption?	Can It Benefit from Customs Duty Exemption?
Livestock Purchases for Dairy-Oriented Integrated Husbandry Investments	YES (Up to the maximum capacity on the incentive certificate)	NO	YES
Livestock Purchases for Meat-Oriented Integrated Husbandry Investments	NO	NO	NO

Livestock Purchases for Breeding Stock Integrated Husbandry Investments	YES (Up to the maximum capacity on the incentive certificate)	NO	YES
Fisheries Purchases for Fish Egg Production-Oriented Fisheries investments	NO	NO	NO
Fisheries Purchases for Meat Production-Oriented Fisheries investments	NO	NO	NO
Poultry Purchases for Egg Production-Oriented Integrated Poultry Investments	NO	NO	NO
Poultry Purchases for Meat Production-Oriented Integrated Poultry Investments	NO	NO	NO
Poultry Purchases for Breeding Poultry Integrated Investments	NO	NO	NO

Place and Date of Application

As applications are always active, applications are made to General Directorate of Incentive Practices and Foreign Capital of the Ministry of Industry and Technology via KEP address. After the application is made, the procedures are carried out on the internet platform E-TUYS.
